

**Start your
career with an
apprenticeship**

**THIS WAY
TO YOUR
FUTURE**

WHY PICK AN APPRENTICESHIP?

02

Over the last 10 years, we've helped more than 25,000 apprentices start new career adventures in tech and business. Here's why our programmes are so popular.

GET PAID TO LEARN

When it comes to your future, apprenticeships open doors and change the game – you'll dodge an average £50,800 in university debt and actually get paid on programme.

With a job from day 1 of your programme, you'll earn £150-250 per week whilst you train for your new career. And with our career progression pathways, you can take your learning as far as you want – all the way from a Level 3 apprenticeship to a recognised Bachelor or Masters degree, totally debt-free.

BUILD SOUGHT-AFTER SKILLS

Our programmes are specifically designed to train you in the tech and business skills employers tell us they need most, so you'll be in demand at any workplace. 90% of our apprentices go straight into full-time jobs after completing.

GAIN VALUABLE WORK EXPERIENCE

On-the-job experience is built into your programme so you can apply your new skills right away in the workplace – and build a portfolio of real work projects to show off to future employers. You'll also build a strong network of other apprentices on your programme.

GET PLENTY OF SUPPORT

A whole support team is dedicated to your success on programme – from your coach, tutors and employer to our Learner Services team. And afterwards, our apprenticeship alumni community (the first in the UK!) helps you build your network, get inspired and have fun as you progress your career.

EMBARK ON AN EXCITING CAREER PATH

Tech is the fastest-growing industry in the world with infinite career possibilities. With average tech salaries at £40k and vacancies booming, there's never been a better time to ride the wave.

WHERE COULD I WORK?

We team up with hundreds of great employers...

From edgy startups to medium-sized enterprises right up to big household names. You'll gain paid work experience and get your foot in the door at some of the UK's hottest companies (how's that for your CV?!). Here are just a few of our employers:

VISA

Penguin
Random
House

vodafone

BT

Royal Mail

JUST EAT

O₂

FUJITSU

Linklaters

TalkTalk
For Everyone

HOW DO I APPLY?

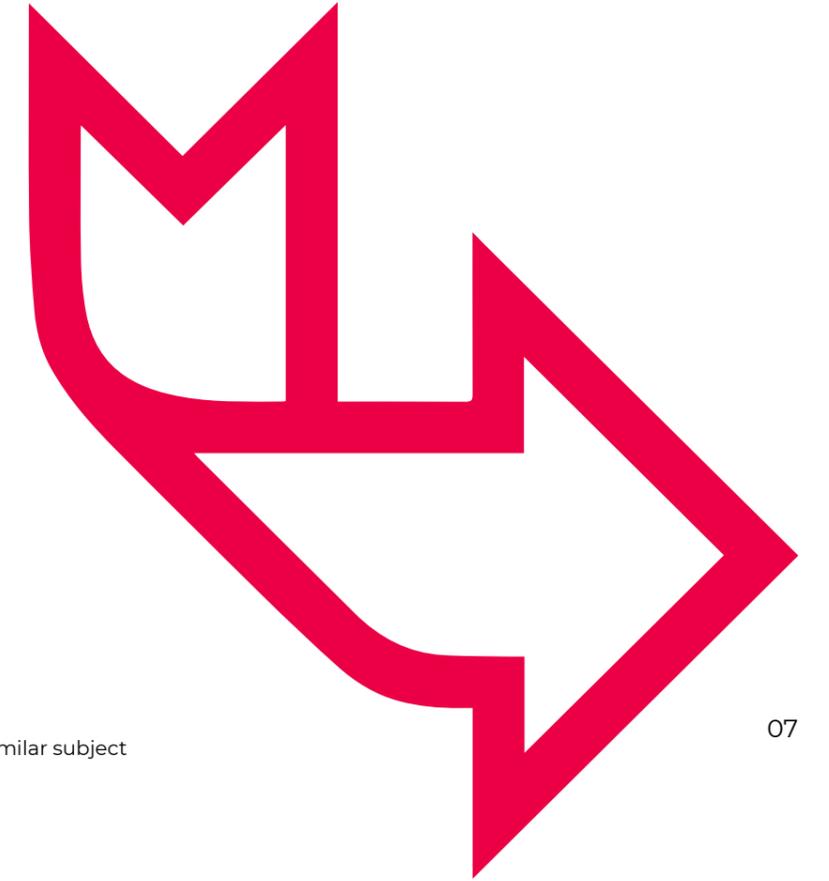

1. CHECK IF YOU'RE ELIGIBLE FOR AN APPRENTICESHIP

- Aged 16+
- Eligible to live and work in the UK
- Must not already hold a qualification at the same or higher level in a similar subject
- 3 GCSEs (or equivalent) at grade 4 or above in any subject*
- GCSE Maths and English (or equivalent) at grade 3 or above

2. Check out our current roles at qa.com/learners/apprenticeships/apprenticeships-listing

3. Apply for a role that suits you!

*These are general eligibility requirements, but please check your programme info for any specific or higher requirements.

**CHOOSE
YOUR PATH
IN TECH**

- Maths requirements: GCSE Maths at grade 4 or above or equivalent (Level 2 Maths accepted); can be exempted by passing the QAHE Maths test (8/15 score required)

TAKE IT FROM US

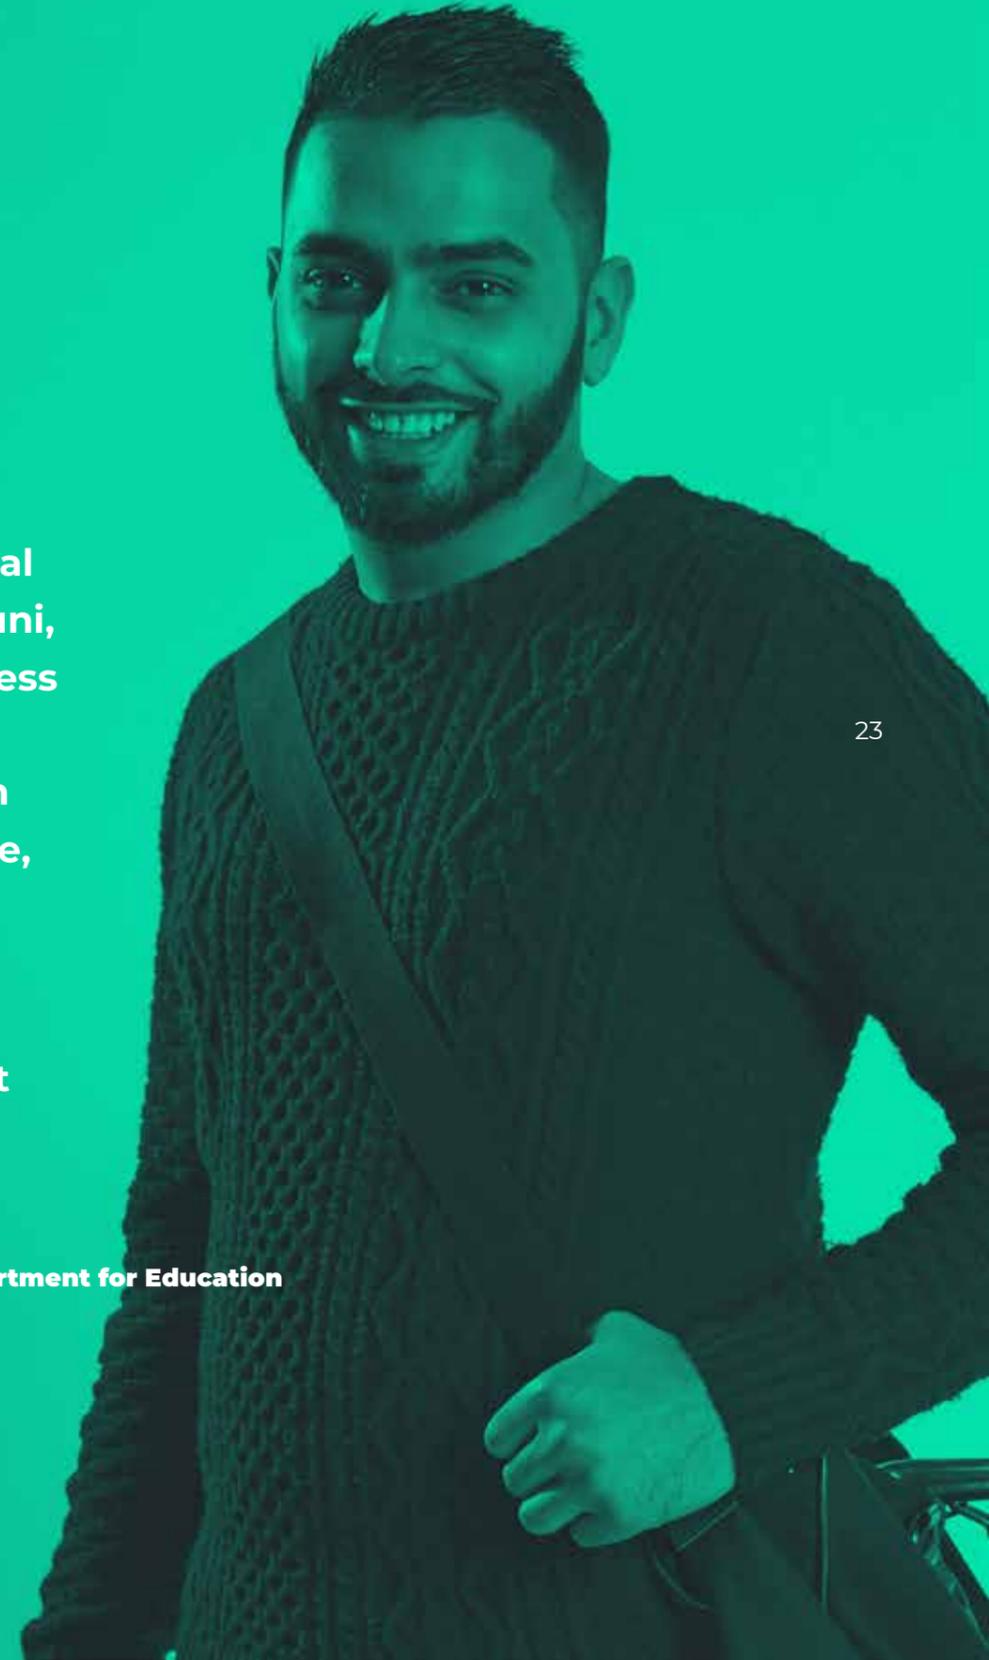

“I originally fell in love with programming at school after someone told me that as a girl, I wouldn’t be able to do it. Now I’m Cisco’s youngest employee worldwide! Through a digital apprenticeship, I’m going to have a degree by 19 with no debt as well as three years’ experience. Being an apprentice is all about finding a spark, something that won’t feel like a job. I love that I’m always learning and building a network of people around me.”

ROSIE — IT apprentice, CISCO

“I’ve always been interested in business, but I’m more of a practical learner than a theoretical one. At uni, I was studying International Business but I realised it wasn’t a great fit for me. I’ve always wanted my own business and now, as an apprentice, I’m learning logistics on a much larger scale. I’m gaining new skills and qualifications, so I feel like I’m ‘winning’ as I work, learn and don’t get any debt.”

ADIL — Business administration apprentice, Department for Education
