

# ***You vs. Train***

**Everyone loses when  
you step on the track**

**Hundreds of people each year unintentionally take on the railway and lose. The railway's full of hidden dangers. If you're not hit by an unexpected train you'll be hit by the lethal current in rails and power lines.**

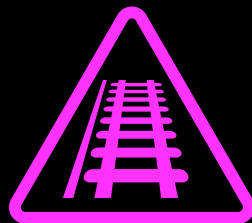

You will be killed or left with catastrophic, life-changing injuries. And your friends and family will be left with the brutal consequences. Everyone loses when you underestimate this opponent. Everyone loses when you step on the track.

**25,000 volts of electricity can jump from overhead cables**

**Modern trains can almost silently reach speeds of 125mph**

**The electrified third rail carries 750 volts of direct current that will attract rather than repel you**
