We can't wait **to meet you**

Many of our students fall in love with Hull the moment they arrive here. Now it's your turn. Visit us at an Open Day and see for yourself.

Open Days

Saturday 26 June 2021

Saturday 2 October 2021

Saturday 30 October 2021

Saturday 27 November 2021

Saturday 8 January 2022

While we're doing everything we can to allow you to visit our beautiful campus as soon as possible, our plans may change in line with government guidance. Please check our website regularly or register for updates.

Book now

“ The highlight of my day was the subject talk! It gave me a really good understanding of the course and what's involved.

“ The Open Day was fantastic and made me excited for the future.

“ One of the highlights of my day was how welcoming the University was. Everyone was just so nice and really helpful.

#ChooseHull

How to get to **Hull**

We're roughly halfway between Edinburgh and London, with direct trains from the capital, Leeds, Manchester and more. And thanks to a brand-new fleet of hi-tech Hull Trains, it's now even faster - and more comfortable - to get here by train. Plus, Rotterdam and the rest of Europe is only a ferry ride away.

“It's so easy to get home because there's a train straight from Hull to London. Hull is also well connected to local cities like Leeds, if you wanted to go for a day trip.”

Abigail
Psychology ClinPsyD

	Humberside Airport - 30 mins Leeds - 1 hour 10 mins Lincoln - 1 hour 10 mins York - 1 hour Sheffield - 1 hour 15 mins Nottingham - 1 hour 45 mins Liverpool - 2 hours 30 mins
	Leeds - 55 mins Manchester - 2 hours Birmingham - 2 hours 30 mins London - 2 hours 30 mins Newcastle - 2 hours 30 mins Edinburgh - 3 hours 45 mins
	Amsterdam - 1 hour 10 mins
	Rotterdam - 12 hours overnight

Travel times based on Google Maps

We're ambitious about the future – both yours and ours

Your time at university will be a fundamentally transforming experience, and it is one of the great pleasures for those of us who work at Hull to see and help shape that transformation. You will graduate into a world that will be different from how it is now, and one that will continue to change in ways we might not even imagine. At Hull, we think it is vital that we help equip you with the skills, drive and confidence to adapt and succeed in any future. It is an exciting journey that I hope you will take with us.

For the University of Hull, that future must be fairer, outward looking and carbon neutral. I am joined by colleagues and current students in believing that our values – inclusive, empowering and progressive – should be more than words and must drive action that informs everything we do here. Right across our University community, staff and students are doing extraordinary things. They are transforming lives, giving others a voice and tackling some of society and the environment's most urgent challenges to make a real difference.

We welcome students from many different parts of the country and, indeed, the world. This diversity and making people feel included is an essential part of who we are. The community here at Hull is vibrant and the pride and enjoyment our students have in it is palpable. This stretches beyond the campus. The University and its students are embedded in the city and the whole region and form an important part of its social, economic and environmental future. In turn, the city and region provide our students with real life learning opportunities and a genuine sense of belonging.

The resilience and care our students and staff demonstrated during the Covid-19 pandemic is a source of great pride. Their response to the challenges it posed was remarkable but, for us, not surprising. They kept each other safe whilst adapting how they lived, learned and taught in order to overcome many challenges and uncertainties. The abilities and thoughtfulness they demonstrated are characteristic of what being at Hull means.

While you are here, you will learn in many different ways, both in and out of formal settings. We are continually evolving the learning opportunities available to you in order to achieve that transformation I highlighted earlier. As a result, our students go on to change lives and positively impact society. They also go on to get jobs; 94.6% of our graduates progress to employment or further study within 15 months of completing their education here¹. Those that employ them get well-rounded, capable and confident people who have been on the Hull journey.

We are very fortunate to have a wonderful campus with a vibrant atmosphere and an outstanding Students' Union which you can discover first hand, whether virtually or in person, at one of our Open Days.

I hope you take the chance to meet us, and I look forward to welcoming you on the start of your journey.

Professor Susan Lea
Vice-Chancellor

Carbon neutral **by 2027**

That's our plan. It's ambitious, we know - but it needs to be. Standing still isn't an option anymore. We've got to act *now* before it's too late. So when 2027 arrives - the year we turn 100 years old - the steps we've taken will start to have a positive impact on the next hundred years and beyond.

The future depends on us. Let's get on with it.

Our home. Our responsibility.

Climate change is a man-made disaster on a global scale. If we all keep living the way we do now, it will lead to devastation for our families, our homes, our businesses. For our entire way of life.

It sounds dramatic. Because it is.

Sea levels are rising. Icebergs are melting. Species are facing extinction. Closer to home, the growing threat of flooding has put Hull on the world's official high risk list. Will our region survive if we keep doing nothing? Not likely. That's why our staff and students are uniting to help solve some of these problems. Not just for us, but for the world beyond our shores.

Want to protect the planet?

Let's do it together.

We're developing our courses and offering opportunities you can't get anywhere else. All to help you get ready for work and take on the climate crisis when you graduate.

What we're doing

46% fewer carbon emissions

We've already cut our own carbon emissions by 46%, so we're way ahead of our 2027 target. But there's still lots more to do and many more problems to solve.

Race to Zero supporters

We've already signed the *Global Universities and Colleges Climate Letter*, which is recognised as part of the United Nations Climate Change *Race to Zero* campaign.¹

Training the next generation

Our vision for a fairer, brighter, carbon neutral future for all informs everything we do. But we also offer exclusive programmes and opportunities to our students, such as:

- Undergraduate degrees in Environmental Science, Earth Science and Marine Biology
- Our Biology students are doing 2,000 hours a year of voluntary conservation work for local environmental organisations as part of their degree
- Our Business Studies students are on work placements with energy companies like Siemens Gamesa, Eon, Drax and Phillips 66
- Our Engineering students have been involved in helping develop alternatives to oil-based plastics with the aim of reducing plastic waste consumption and protecting our planet
- Masters courses in Renewable Energy, Flood Risk Management and Advanced Energy Technologies for Buildings and Industry
- MSc Masters Degree Apprenticeship in Offshore Wind Energy Engineering with Siemens Gamesa Renewable Energy
- Almost 100 fully-funded PhD scholarships to deliver research into low carbon energy and climate resilience ring challenges facing the offshore wind industry.

Find out what else we're doing and how you can get involved.

¹ Find out more at sdgaccord.org/climateletter and unfccc.int/climate-action/race-to-zero-campaign.

OFFICIAL UNIVERSITY PARTNER

Extraordinary is in you. And we'll help you find it.

We believe there's a spark of extraordinary in everyone. But we also know that extraordinary doesn't just happen. It takes your hard work and determination, our support and inspiration, and then you too can let it shine.

This is what our partnership with Team GB is built on. Our united belief is that anyone, with the right opportunities ahead and a dedicated team behind, can achieve extraordinary things.

Our shared mission is to show this to the world. Because extraordinary can be a record-breaking, gold-medal-winning performance in front of millions, or simply being the first to talk in a roomful of strangers. We see it in everyone.

It's speaking out against injustice, trusting your conscience. Making changes to your own life to help make the world a better place. Chasing your personal best, getting your highest mark yet and still pushing for higher, still beating yourself. Still meeting people from around the world for the first time. Learning what their lives are like, then ending up friends for life.

It's life-changing. It's knowing that here, you matter - no matter where you've come from. Here, you can achieve whatever you want to, go wherever it takes you, conquer heights, imagine sights others can't see. It's that indescribable feeling that tells you: here is where I'm meant to be.

Extraordinary is happening right now. On fields and tracks, in lectures and laboratories. In boxing rings and workshops and studios and surgeries. On the next street, in the heart of our city, even next door. It's in you. So what are you waiting for?

Highlights so far

Max Whitlock MBE x University of Hull

To celebrate the two-year anniversary of our partnership with Team GB, double Olympic champion Max Whitlock was recently announced as our lead ambassador.

As a trailblazer in his sport, Max will give students the opportunity to gain insight into the mindset of an elite athlete at the pinnacle of their profession. As a source of inspiration for all those chasing success - Max is the first ever British gymnast to win gold at the Olympic Games - and as one of our great sporting heroes, he's set to bring a sense of pride to staff and students.

History students research Team GB's past

An ongoing research project, One Team GB, sees students and academics explore the history of British Olympic champions of the past. The aim is to inspire current Team GB athletes to achieve success by connecting them to their athletic heritage.

Minsk 2019 Kitting-Out

Ten students spent four days volunteering at the Team GB kitting-out event ahead of the Minsk 2019 European Games. It gave them a chance to meet Team GB athletes, including cyclist Jason Kenny, and be part of the buzz surrounding the first major step in the build-up to a major Games.

Get-up-and-Ogogo

In June 2019, bronze-winning Olympian Anthony Ogogo came to campus to share all the setbacks he's faced in life, and how he got back up and overcame them

Marketing student creates Olympic-themed app

Hull students were tasked with creating new marketing ideas for Team GB to engage fans. The winning student impressed with her concept of an Olympic-themed app, and as a result enjoyed an exclusive one-to-one Q&A with British Olympic Association's Head of Marketing, Ed Jones, to discuss his career path to date, and to get advice on how she could progress her own marketing career.

One hub for everything Team GB

One lucky student is due to create a new Partner Hub for Team GB and its partners, allowing easier access to Team GB documents and branding, and streamlining the process of sharing information.

To find out more about the partnership, visit

Your guide to degree options

At Hull, it's all about choice. Whether you want to combine two or more subjects, study abroad for a year or gain hands-on experience as part of your degree, you'll find plenty of options here.

What type of degrees does Hull offer?

Single Honours degree

You study modules from a single subject area.

Combined Honours degree

You study a mix of modules from two or more subject areas.

Integrated Masters degree

You study a year of postgraduate-level study on top of your degree course.

How are degrees taught?

Most of our undergraduate courses are made up of study units called modules. You'll be assessed after each module, and the average of all your module assessments for the year is your overall result for that year.

Can I pick and choose modules?

Yes, to an extent. Some modules are compulsory, so you have to take them. Within that compulsory group are some 'core' modules, too. They're essential to the course (to make sure our degrees qualify for relevant accreditation, for example), so they'll never change and you have to pass them. That said, some of our modules are optional - so you can pick what you study to suit your interests and career goals.

How many modules will I take?

Usually, you'll take six modules a year: three from the start of term to Christmas, and three more between January and the summer. Later in your course, some modules - like larger-scale projects or a dissertation - might count as two modules and run for the full year.

Remember...

We're continually adapting and evolving our courses so that we meet the changing needs and expectations of our students and employers.

We check that our programmes reflect national benchmarks; that they enhance our students' skills; that they're relevant to you and to your potential future employers; and that they meet the demands of regulatory bodies (for example, to earn accreditations that are essential in some subjects and for some professions).

What this all means is that the course information in this guide is correct at the time of going to print. But - for the reasons we outlined above - some of our courses could still change before you start university in September 2022. You can find all the latest information on the course pages of our website. Or if you have any questions or need further info, you can email our admissions team at admissions@hull.ac.uk.

What extra course options can I choose?

👥 Foundation year

An extra year of study at the start of your course. Designed to boost your academic skills and knowledge of your specialist area, and leads into a full degree programme. Fees are exactly the same as undergraduate years, and you can apply for student finance as normal.

To be considered you typically need 80 UCAS points, but we look at more than just your grades in your application. Are you a motivated person who has the potential to succeed here? Do you have life or work experience related to your subject? Can you confidently show all this in an essay or an interview? Then we want to hear from you.

✈️ Study abroad

Many of our courses include a year abroad in Year 3. Students on other courses can apply to spend a trimester, semester or a single module overseas. You can also choose to study abroad over the summer or as an exchange student at one of our partner institutions through our careers team. See pages 26 and 174 to find out more.

🏭 Industrial placement

A full year, a semester or one module in industry or structured work placements (usually between Year 2 and your final year). See pages 43, 94, 120 and 180 to find out more.

Accounting and Finance

Develop an in-depth knowledge of global accounting and finance and get taught by staff with real-world experience. Our accreditations, connections with world-leading brands and the opportunity to hone your skills in real-life scenarios puts you one step ahead.

“ I chose Accounting with Professional Experience at Hull because the course allowed me to gain an in-depth understanding of what accounting is, as well as provide me with the maximum ACCA exemptions to become chartered later on. My placement year proved to me that hard work pays off and anything is possible.

Aaliah Bhamji
BSc Accounting with Professional Experience

At Hull, you'll get the perfect foundation for your future career in the rapidly developing world of accounting and finance. We've made significant investment in industry-standard software, including our Bloomberg Financial Markets Laboratory, offering simulated financial trading activities in real time - so you can practise your skills in realistic scenarios before you go out there and do it for real.

Accreditations

Our accountancy programmes are accredited by the main accountancy bodies: ACCA (also as an Accelerate Partner), CIMA (as a University Partner), CIPFA, ICAEW (as a Partner in Learning) AIA, CFA and CPA Australia. All Hull University Business School degrees have international accreditation from AACSB, which is held by fewer than 5% of business programmes worldwide.

Our degrees' professional accreditations give you significant exemptions from essential professional exams. That offers you a faster route to professional qualifications, because you graduate already part-qualified - and you could start on a higher salary. Our partnership with ACCA lets you register for the Future Talent Academy: an employability platform full of useful content, activities and advice. Likewise, our relationship with CIMA means that you can study for a CIMA qualification as part of your degree.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

➔ **Find out more** - Go to pages **94** and **180** to find out about our work experience placements, and page **34** to discover the Business School.

What we offer

Course	Typical offer	Example A levels	UCAS code	👥	✈️	🏢
BSc Accounting	112	BBC	N400	NNIG [§]	N401	N402
BSc Financial Management	112	BBC	N340	NNIG [§]	N341	N342
BSc Accounting and Financial Management	112	BBC	NN43	NNIG [§]	NN4H	NN4J
BA Business Management and Accounting	112	BBC	NN14	NNIG [§]	NNC4	NND4
BA Business Management and Financial Management	112	BBC	NN13	NNIG [§]	NNC3	NND3

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

On successful completion (pass) of the BA Business Management Foundation Year (course NNIG), you can either continue with that degree or join Year 1 of any other undergraduate degree in the Business School, subject to meeting any GCSE requirements for that degree.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

Where could this take you?

Recent graduates from these courses have found work with organisations including Citibank, Lloyds Banking Group, Fujitsu and Smith & Nephew. Many graduates go on to work in the 'Big Four' - Ernst & Young, Deloitte, PWC, KPMG - as well as organisations spanning private, public and not-for-profit sectors.

Graduate roles

- Chartered accountant
- Financial or management accountant
- Auditor
- Stockbroker

Career advice and support

Our careers team will help you learn how to apply for positions and prep for interviews. We also run networking events on campus, which could lead to internships and job offers.

You'll benefit from our Centre for Professional Success too. They'll support you in sourcing relevant placements and employer projects. You'll also get access to our global alumni community, which can help you identify potential mentors and develop your professional networks.

American Studies

The Civil War. The Cold War. Hollywood. Disney. Trump and his Tweets. There's nowhere in the world quite like the USA. Study history, literature or culture, and embrace the rich diversity of American Studies. You can also spend a full year abroad at a university in the US.

“ I chose American Studies as it's interdisciplinary - you learn a range of different skills and learn about new ideas. The tutors are excellent - you get to know them and always have support.

Added to that is the amazing opportunity of the year abroad. I went to Amherst, a college town about two hours outside of Boston. The highlight was meeting such a vast range of people - I now have friends dotted all over America.

Connie Fredrickson
BA American Studies

We've been pioneering the teaching of American Studies in the UK for more than 50 years, and our academics are approachable experts who offer experience and support. You can create a flexible degree, choosing from a range of subjects - such as history, film or literature - to suit your own interests and career aspirations.

We bring together American politics, history, media, literature and culture to shed light on current topics. So America itself becomes a case study. You can see that from our students' recent dissertations, which covered topics including the National Parks Service; *Orange Is the New Black*; 'when a President doesn't tell the truth'; LGBTQ+ rights; and gun control - to name just a few.

1st

in the UK for overall student satisfaction in this subject area, with a 100% score.¹

Spotlight on...

Studying abroad

Today, Hull. Tomorrow, the world.

Anyone can go abroad during their time here at Hull. Sarah did just that as part of her degree, and you can too. If you choose to study American Studies like Sarah, you'll study at one of our US exchange partner institutions, or you can take up one of the other overseas opportunities through our careers service - be it volunteering or an internship. Imagine it. A summer in Sweden, a trimester in Australia, a whole year in the US ... we can make it real.

Sarah Birt, BA American Studies graduate, made the most of her time in Arizona. As she tells us ...

“ I was browsing through prospectuses and saw that Hull ran an American Studies programme which sounded really interesting, so I decided to attend an Open Day. It was at the Open Day that I really thought, 'Wow, this is for me'. The American Studies department staff were really friendly; I met some super-enthusiastic students and the whole University just gave off a really inclusive, friendly vibe. This really stood out to me as a sign that Hull was the place to go.

American Studies is a fairly specific subject, so I chose Hull initially because their choice of partner universities in America is unrivalled, and the support I received in sorting out my American year was great. "My year abroad is a definite highlight. Getting to go to Arizona and experience life there was amazing, as was all the travelling I did whilst in America. I even met Bernie Sanders. It was also really awesome coming back for my final year after I hadn't seen all my Hull friends for a year!

Sarah
BA American Studies

Biology

Guided by our award-winning experts, you'll gain industry-standard lab skills in cutting-edge techniques like genetic analysis, microscopy, DNA sequencing and bioinformatics. This flexible programme gives you the opportunity to specialise and study what you love.

“ Hull offers fantastic facilities, high-quality teaching and, more importantly, great contact with lecturers. You are trusted and supported to excel at what you're capable of. It's very rewarding.

Hull doesn't just teach you how to pass a degree, it teaches you how to think. You are geared up for research and are taught how to be a scientist.

Michael Winter
BSc Biology

Explore the diversity of modern biological sciences – from small-scale molecules, genomes and cells to whole organism and ecosystem processes. Biology is all about 'hands-on', with core teaching in genetics, genomics, microbiology, cell biology, evolution, biological diversity and options in metabolism, pharmacology, human biology and disease, ecotoxicology, ecology, animal behaviour and conservation. You can also learn to dive during your degree. This allows you to build a course to suit your interests and ambitions.

Excellent teaching is highly valued here. Hull is the only university in the world to have two winners and one runner up in the Royal Society of Biology's Higher Education Bioscience Teacher of the Year Award. And you can take part in our research. This course could see you investigating topics such as the evolution of sex, the genomics of crop pests, or genetic adaptation to environmental stress.

We pride ourselves on our unique blend of laboratory and field-based practical teaching, as we recognise the need to work across disciplinary boundaries to solve global issues. Our facilities include new genomics laboratories and supercomputer facilities, a 33,000-litre tropical aquarium, helping us research the relationship between genes and behaviour, and flexible teaching labs supported by technicians dedicated to developing your suite of skills.

96%
of students in work or further study 15 months after graduating.¹

¹ UK domicile full-time first degree leavers, Graduate Outcomes survey for the academic year 2017/18, published by HESA 2020.

What we offer

Course	Typical offer	Example A levels	UCAS code	
BSc Biology	120	BBB	C100 [†]	C101 [§]

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

[†] You also need A level Biology or Applied Science at grade C or above (or equivalent), including a Pass in the practical element in Biology for reformed A levels completed in 2017 or later.

Where could this take you?

The field, analytic and lab skills you'll learn here are much in demand, and you'll get the chance to engage with potential employers in a range of local organisations and businesses.

We also offer a practical Biology with Education module to final-year students, many of whom go on to postgraduate teacher training.

Graduate roles

- Biologist
- Laboratory scientist
- Postgraduate researcher (MSc or PhD)
- NHS research assistant
- Biotechnologist
- Biology teacher
- Science Communicator / Broadcast journalist
- Conservationist

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prepare for interviews and impress potential employers.

We can also get you into the room with employers at on-campus events. Networking helps you plan your career and can open doors to internships and job offers.

★ Extraordinary people

Dr Katharine Hubbard
Lecturer in Biology

Dr Hubbard is passionate about how STEM subjects can be taught more effectively. She was the Royal Society of Biology's Higher Education Bioscience Teacher of the Year (2016), and a Society for Experimental Biology President's Medallist in 2017.

World explorer

The field work opportunities on these degrees are exceptional. The exact destinations will depend on your course, but recent overseas trips have included Mallorca, Brazil and Malaysia (extra fee may be payable). Structured Research Projects bring together laboratory and field skills and have included research into environmental stress in laboratories in Portugal.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

Biomedical Science and Forensic Science

Be inspired by our expert lecturers as you train for a career at the cutting edge of life-saving research and diagnostics. Our courses focus on employability and are designed to ensure graduates leave with the knowledge and skills they need to be successful.

“ The best part of the course is being able to learn diverse parts of forensics - from sample collection and testing to how DNA can be magnified and amplified to compare them to known samples.

I've enjoyed the teaching throughout the whole course, specifically how supportive and welcoming all the lecturers are.

Claire Densham
BSc Forensic Science

A Biomedical Science degree from Hull opens doors to a career in laboratory science and beyond. Through supported lab learning, you'll gain a deep understanding of the human form and function in health and disease. We designed our Biomedical Science degree with input from the Hull University Teaching Hospitals NHS Trust.

Our Forensic Science degree equips you with the skills to go beyond the theory and gain practical experience in crime scene investigation, lab analysis and how to present evidence in court.

We've got excellent relationships with local biotechnology companies, research units, hospitals and the police to reinforce our degree courses. We embed transferable skills across the courses to boost your employability and our courses are flexible, with a carefully designed range of module options to equip you with the knowledge and skills to succeed.

Accreditations

The Institute of Biomedical Science accredits our Biomedical Science degree. So you can be confident that it's been approved by expert academics and professionals as meeting industry standards.

91%
of students in work or further study 15 months after graduating.¹

¹ UK domicile full-time first degree leavers, Graduate Outcomes survey for the academic year 2017/18, published by HESA 2020.

What we offer

Course	Typical offer	Example A levels	UCAS code	
BSc Biomedical Science	112	BBC	BC99 *	BC9Y [§]
BSc Forensic Science	112	BBC	F410 †	F411 [§]

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

* You also need A level Biology or Applied Science at grade C or above (or equivalent), including a Pass in the practical element in Biology for reformed A levels completed in 2017 or later.

† You also need A level Biology at grade C or above (or equivalent), including a Pass in the practical element for reformed A levels completed in 2017 or later.

Where could this take you?

A Biomedical Science degree from Hull equips you to work in academic research, the NHS, medical institutions and in education. Our graduates go into a range of other careers with employers including Smith & Nephew, ConocoPhillips, RB and Boots, plus various hospitals and the NHS.

Our Forensic Science degree equips you to work as a forensic scientist, an academic researcher, as a commercial scientist, in scientific sales, as a data analyst or in education or teaching - to name just a few possible destinations.

Graduate roles

- Biomedical scientist
- Forensic scientist
- Research scientist
- Biotechnology consultant

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers.

We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

Facilities

We're one of the few campuses in the UK with a pre-clinical imaging unit, which links biomedical science with chemistry and medicine. And you could have the chance to carry out research projects spanning different scientific disciplines. In particular, the Allam Research Building - which houses some of our research labs - is a centre for cancer and cardiovascular research.

We have specialist crime scene training facilities. You could also have access to our Microscopy Imaging Suite and Positron Emission Tomography Research Centre. That's a state-of-the-art facility which uses medical imaging technology for research and the early diagnosis of diseases such as cancer and dementia.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugbiomed

Business and Management

All of our business and management degrees offer real-world experience. Each year you'll take part in projects, case studies and collaborations with businesses which could include Tesco, Young's Seafood and McCain Foods. It's our way of putting you - and your career - at the forefront of what we do.

“Hull University Business School is a catalyst for creativity and provides many different live business projects to get stuck into.

I did a summer school at Stockholm Business School where I studied PR and advertising. Before, during and after my time in Sweden, the international office were always there to provide support, preparation and guidance.

Will Foote
BA Management and Marketing graduate 2019
Now working at Red Bull, Austria

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

At the heart of this subject area is our BA in Business Management. This course gives you a strong base of business management knowledge - widening your employment options while letting you explore areas that you might want a career in. You can build around that solid business core through a series of specialisms. We teach you about disciplines like accounting, marketing, HRM, sustainability, supply chain management or entrepreneurship.

From day one, we'll treat you like a future business professional. We'll prepare you for the challenge of staying up to date in the unpredictable, dynamic business world. You could find yourself working with a local SME to solve a problem with their business, collaborating with Team GB and becoming proficient in the latest software.

Flexible approach

In Year 1, you'll take modules that are common across the whole Business School. That gives you a solid base of business knowledge - which employers often look for, as they want a general understanding of business as well as a specialism. It also means you'll be able to focus on a specific area or change direction in your second year, if you want to.

Accreditations

All Hull University Business School degrees have international accreditation from AACSB, which is held by fewer than 5% of business programmes worldwide. Our degree specialisms also have relevant professional accreditations, such as CIPD, CIM, CIPS and CILT.

World explorer

You'll have opportunities to study abroad - for a year, a semester, or over your summer break that will count towards your degree - at one of our highly ranked partner institutions.

» **Find out more** - Go to pages 94 and 180 to find out about our work experience placements, and page 34 to discover the Business School.

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

On successful completion (pass) of the BA Business Management Foundation Year (course NN1G), you can either continue with that degree or join Year 1 of any other undergraduate degree in the Business School, subject to meeting any GCSE requirements for that degree. Points can be from any qualification on the UCAS tariff, but must include at least 80 points from two or more A levels, or a combination of appropriate Level 3 qualifications.

Where could this take you?

Our graduates go on to successful careers at a variety of businesses such as IBM, Red Bull, Morrisons, Next, Rolls-Royce and HSBC. Or if your goal is to be your own boss, our entrepreneurship pathway will guide you through the process of planning and setting up your own business.

Graduate roles

- Business development executive
- Management consultant
- Product manager
- Project manager
- Training and development manager
- Corporate responsibility manager
- Human resources officer

Career advice and support

Our Careers team will help you learn how to apply for positions and prep for interviews. We also run networking events on campus, which could lead to internships and job offers.

You'll benefit from our Centre for Professional Success too. They'll support you in sourcing relevant placements and employer projects. You'll also get access to our global alumni community, which can help you identify potential mentors and develop your professional networks.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugbusiness

Spotlight on...

Hull University Business School

We mean business

When you first come through our doors, you're not walking into a classroom - you're entering the world of business. From that moment on, it's our job to train, inspire and challenge you to be a responsible leader. Someone who never stops looking for new solutions to global challenges. Who wants to shape a sustainable future for business, society and themselves. So by the time you graduate, you'll be ready for your first career, your next one, and each one after that.

The real deal

We call it Authentic Business Learning. It's our real-life, hands-on, hard-working approach to teaching - we know the best way to learn about business is to do it for real. From day one, you'll get to test your skills out in the real world through live projects of our industry partners (past companies have included Team GB, Young's Seafood and Rix Petroleum), placements, internships, and more. That way, you leave here as a business graduate and a future professional. Go to page 94 to read more about our industry placements.

Guten tag, schön dich zu treffen

Bonjour, ravi de vous rencontrer. Hola, ¡mucho gusto! Business is global. And many employers actively look for graduates with international experience. Skills that go over and above the polite hellos and nice to meet yous. Things like cross-cultural awareness, social intelligence and adaptability. Studying abroad - for a year, a trimester or even over the summer - can help you develop these skills.

Thanks to our partnerships with some of the best ranked Business Schools in Europe and across the world, you'll also get the chance to study specialised modules in areas like luxury brands, sport economics and aviation management.

No more 'business as usual'

This isn't the time to stand still, turn a blind eye and pretend nothing's changed. Now more than ever, ethics, sustainability and social responsibility need to be at the forefront of every business decision. The difference with us is, we don't just tell you this. We show you.

As we speak, our academics are busy working on issues like plastic waste, renewable energy, and sustainable business practice. Both locally and globally. So everything you learn from them prepares you for the complex challenges of tomorrow.

And we're one of the first business schools in the UK to become a member of the Principles of Responsible Management Education (PRME). That means all our undergraduate programmes offer you a thorough grounding in sustainability.

“ Get involved with all the opportunities - placements, internships, year abroad and summer school are all fantastic experiences.

Zoe Jephtha
BA Business
Placement year: Channel Sales
Associate, Lenovo UK & Ireland

Chemical Engineering

Chemical engineering applies science to the design, construction and operation of processes used to change raw materials into useful everyday products such as food and drink, beauty and household products, pharmaceuticals, fertilisers, energy, and fuels. And thanks to our links to local industry, Hull is the ideal location to study this subject.

“I've always loved chemistry and I enjoy seeing how machinery and chemical reactions work together.

When I first came to visit Hull, I got the feeling that this is where I wanted to go. I hadn't got that feeling with any other university. When I walked in, I just got it.

Joshua Jones
BEng Chemical Engineering

We're in a region with a high concentration of process industry companies, including BP, Total, Phillips 66, Smith & Nephew, RB, INEOS, Centrica Storage and Croda, providing many opportunities for placements and potential employment. Many Hull engineering graduates find work with major companies based in the area.

All of our students get free membership of the IChemE and the Energy Institute - giving you the chance to visit local companies, listen to expert speakers and network with local employers.

Here you'll have access to a lab housing advanced teaching equipment, and there's process safety training for all Year 1 students and MEng Year 4 students (provided by an external process safety training company). This is highly valued by employers and helps you to stand out from graduates of other universities. And the MEng Year 4 module provides you with an extra IOSH qualification.

Skills enhancer

Our degrees have a strong industrial involvement. Chemical engineering professionals contribute to teaching, and in recent years companies including Croda, INEOS, Tronox and BP Acetyls have supported our flagship final-year design project.

Experience amplifier

We'll take you to one of the UK's best training facilities: CATCH (Centre for Assessment of Technical Competency - Humber). There, you can experience life as a chemical engineer, using real equipment and operating procedures. And our virtual control room lets you play the role of a plant operator at an actual control desk - overseeing a real-time 3D simulation of a chemical process plant.

What we offer

Course	Typical offer	Example A levels	UCAS code		
BEng Chemical Engineering	120 - 128	ABB - AAB	H810	H812 [§]	H813
MEng Chemical Engineering	120 - 128	ABB - AAB	H811		H815

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications. You also need A level Maths and Chemistry at grade B or above (or equivalent), including a Pass in the practical element in Chemistry for reformed A levels completed in 2017 or later.

Where could this take you?

As the site of Britain's 'energy estuary', the Humber region is a hotbed of placement and career opportunities - it's home to more than 350 engineering and process companies. So when you graduate, you'll be in a prime spot to access a range of career paths across multiple industries.

Graduate roles

- Chemical engineer in the water industry
- Bioproduct engineer
- Food processing engineer
- Process engineer in the energy industry
- Pharmaceutical consultant

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers.

We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

Accreditations

Our degrees are accredited by the Institution of Chemical Engineers (IChemE) and meet the academic criteria for registration as a Chartered Engineer. The MEng options give you the mandatory four years of study that you need for accreditation as a Chartered Engineer.

Why is there a range of points for the course I'm interested in?

If you apply for one of these programmes, you'll receive an offer that aligns to your predicted points.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugchemeng

Chemistry

Chemists make substances that change the world, and you could be part of it. From modern medicine to climate change, from solar cells to forensic science and from computer chips to low-fat chocolate, they all hinge on chemistry. And at Hull, you'll be trained and inspired by leaders in the field.

“I've always wanted to do something in science. From high school, I started to realise that I preferred chemistry and physics. I found Hull did exactly the course I wanted to do. When I came to visit, I felt this is where I should be. The atmosphere is very friendly and welcoming. I couldn't have chosen a better place to be.”

Eden Rose
BSc Chemistry

Our Chemistry course has been constructed so that you can develop your interests and specialisms throughout the programme. This may be in analytical chemistry, advanced materials, medicinal chemistry, polymer chemistry, sustainable, environmental and green chemistry as well as the core inorganic, organic and physical chemistry topics. This culminates in a group project in year 3 and an extended individual project in year 4, under the guidance of a member of academic staff with expertise in the area you've chosen.

Our Chemistry degrees are offered as a three-year BSc or a four-year MChem programme for those who want to explore chemistry at greater depth, and who anticipate a career in either industrial or academic chemistry. The MChem programme can also include a year-long placement in the chemical industry where you can put your knowledge in the context of real-world problems.

The latest national assessment (REF 2014), classified 79% of our research as 'world leading' or 'internationally excellent'. And you'll have the opportunity to work closely alongside these world-class researchers during your final-year project.

🏠 Facilities

We've got the tools to back up your talent. You'll benefit from our continuing investment in chemistry, including high-performance computing, the latest mass spectrometry facilities and new resources - including laser technology for elemental analysis and a microfluidic fabrication capability.

▶ What we offer

Course	Typical offer	Example A levels	UCAS code	👥	🏭
BSc Chemistry	112 - 120	BBC - BBB	F100	F104 [§]	
MChem Chemistry	112 - 120	BBC - BBB	F102		F103

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications. You also need A level Chemistry/Applied Science at grade B or above (or equivalent), including a Pass in the practical element in Chemistry for reformed A levels completed in 2017 or later.

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

🚪 Where could this take you?

One reason for the high employability rates among our graduates is our connection with industry. We're surrounded by one of the highest concentrations of chemical industry in the country. We've got research links and fruitful collaborations with industry giants such as AstraZeneca, GlaxoSmithKline, Pfizer, RB, Schlumberger and Unilever. Many of these companies have facilities on our doorstep. And our graduates frequently go into successful careers with these companies, as well as with others such as Novartis, Smith & Nephew and Croda International.

🎓 Graduate careers

- Industrial research
- Academic research (PhD and DPhil)
- Further study (MSc, MRes)
- Industrial chemist
- Environmental scientist
- Process development chemist/scientist
- Analytical chemist
- Quality control chemist
- Pharmaceuticals
- Biotechnology
- Teaching
- Accountancy and banking

🌐 IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

🏆 Accreditations

Our full-time Chemistry courses are accredited by the Royal Society of Chemistry. So not only can you join the society, but - after some career experience - you can achieve Chartered Chemist (CChem) status.

95%
of students in work or further study 15 months after graduating.¹

¹ UK domicile full-time first degree leavers, Graduate Outcomes survey for the academic year 2017/18, published by HESA 2020.

🚪 Why is there a range of points for the course I'm interested in?

If you apply for one of these programmes, you'll receive an offer that aligns to your predicted points.

Computer Science

Discover the technological advances and exciting challenges of computer science in this fast-evolving discipline. Gain a thorough grounding in the fundamentals before focussing your studies to match your interests and gain experience with our strong industry connections.

“ My time at Hull prepared me for success. It's really important to inspire a future generation of students because it's the students studying computer science here and all over the world that will be making the apps and games of tomorrow.

Josh Naylor
BSc Computer Science for Games Development Graduate

Skills enhancer

We have strong links to companies like Microsoft, Sony and Studio Gobo. They help us ensure that our course content stays up to date and relevant. In 2019, 20 students took part in the world's first Microsoft HoloLens summer school. Working with companies including Audi, Centrica and AB InBev (brewers of Budweiser), they used Microsoft's mixed-reality headset to tackle real business problems.

As the course progresses, you'll begin to specialise in areas that interest you: software engineering and development, computer games and graphics programming, and applications of computing and artificial intelligence. Our modules range from advanced programming and computational science through parallel programming and graphics to starting your own tech business.

There are extracurricular events, from industry speakers to programming competitions - including our 'Three Thing Game', where you'll work in teams to put together a game over a weekend.

Our programmes also offer different routes, with a foundation year or an optional extra year on a paid work placement or studying abroad. Recent placements have involved companies like BT, BAE Systems, Microsoft and IBM. It's an amazing way to apply your knowledge to the real world and make valuable industry contacts.

Facilities

Here you'll have access to the Hull Immersive Visual Environment (HIVE), with VR headsets, 3D immersive cube and auditorium, so you'll be able to explore your own games and apps from the inside. There's also the SuperLab, with 172 PCs and the Wilkes Laboratory, with console dev kits including PlayStation and Xbox. All labs are supported by gigabit networking. We also have three motion capture environments for drones and VR/AR/MR. Additional facilities include our robotics lab, with humanoid Baxter and Nao robots. And there's the FabLab, where you can use our bank of 3D printers to digitally fabricate models and prototypes.

➡ **Please turn over** to find out more about taking a placement year.

What we offer

Course	Typical offer	Example A levels	UCAS code			
BSc Computer Science	104 - 112	BCC - BBC	G400	G401 [§]	G404	G403
MEng Computer Science	120	BBB	G402

Spotlight on...

A year in industry

Connection successful

There's no experience like work experience. Especially when it's with the biggest broadband provider in the UK. Computer Science student, Sam Hutchinson, spent his third year in industry working at BT's global research and development HQ. Now he's on their technology graduate scheme, looking forward to a bright career in the telecommunications industry. And it all started with a bit of networking ...

While searching for a placement at the start of his second year, Sam booked himself on to CV-writing and interview workshops run by our Careers Service.

“ My advice to others would be to begin looking early in your second year as that's when a lot of employers will open for job applications. The earlier you apply in the process, the better chance you have of securing a placement, as companies will be slowly filling their spots as time goes on.

One of the biggest benefits of a placement year is that you mature and grow a lot as an individual. You learn loads about your industry and pick up skills in your chosen field. There's also the opportunity to grow your professional network.

A lot of students shy away from doing a year in industry because they want to graduate with their friends. My advice would be to consider yourself first. Gaining work experience can help your employability prospects. A year in industry can also help you decide what modules to choose in your final year, as well as what to do for your dissertation.

💡 **Want to find out more?**
Visit: hull.ac.uk/ugcomputer.

As part of the Software Defined Networking Platforms Team, Sam worked on software projects that authenticate broadband connections for BT's wholesale customers. He also got the chance to research open-source cloud technologies to provide remote broadband authentication services to rural areas of the UK.

Creative Industries

We believe in arts for all. Whether you're a virtuoso-in-the-making, or you want to delve deeper into a subject that's always fascinated you. With a degree in Creative Industries at Hull, you'll emerge as a confident professional with an enviable portfolio, ready for a career in leadership within the arts.

“Hearing how passionate the lecturers were about helping you achieve your potential, and doing the subjects that they love at the Open Day, made me realise Hull was the place I wanted to do my degree.”

Lauren Cloke
Drama

Experience amplifier

You get to put your skills to the test in the real world. Co-producing, auditioning, shadowing, coaching, negotiating and more with the likes of Hull Truck, The Royal Philharmonic Orchestra, BBC Introducing, Solid State Logic, Screen Yorkshire, Absolutely Cultured, Opera North and Freedom Festival. Plus, you could even secure one of our work placement opportunities with an organisation we work with.

These aren't just dream degrees for dream careers. They're very real and reachable options, and they come with very real opportunities and career prospects. From day one, you'll gain a strong grounding in business and digital know-how, including leadership, marketing, presenting, event planning and project management. And you'll explore critical issues in the arts like health and well-being, and entrepreneurship.

On top of all that, you'll push your creative and practical skills in your chosen specialism: Music, Music Production or Theatre Production. That could mean performing in our world-class concert venue. Or mixing your own tracks in industry-standard recording studios (and that means using Avid's Pro Tools and Solid State Logic consoles like Duality, AWS948 and AWS924). Or working in creative design teams on projects that resemble real-world experiences of working in the creative industries.

And in your final year, you'll complete a major project alongside others from across the arts, as a springboard into your future career.

When you join Hull, you join a creative community of like-minded performers, producers, composers, designers, storytellers, film-makers and writers. And you'll often get the chance to collaborate and co-produce with them. Either with students on your Creative Industries course or students from other creative and digital degrees, including English, Creative Writing, Film Studies, Drama and Theatre Practice, Game Design, Graphic Design (new for 2021), Media Production, Media Studies, Music, and Music Production.

➡ Please turn over to find out more about our new degrees for career-driven creatives.

What we offer

Course	Typical offer	Example A levels	UCAS code	
BA Creative Industries: Music	112	BBC	WW13	WW16 [§]
BA Creative Industries: Music Production	112	BBC	WW14	WW16 [§]
BA Creative Industries: Theatre Production	112	BBC	WW15	WW16 [§]

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Facilities

Middleton Hall is our world-class concert venue. Inside, you'll find industry-standard recording studios equipped with Solid State Logic consoles and PMC monitors. Plus, surround sound audio visual studios, rehearsal spaces, and a 3D sound (ambisonic) studio. It also houses the region's best digital cinema. Elsewhere on campus, you'll have exclusive access to our media labs. Home to the latest digital media software and hardware used in the industry today. Then there's our Grade II-listed Gulbenkian Centre: a purpose-built working theatre complete with studios and workshops.

Where could this take you?

Did you know that 10% of all UK jobs are creative? Or that the creative industries contribute £100bn a year to the UK economy? Or that they employ over 2 million people across the country? Or that 75% of those 2 million jobs are based outside London? Or that the sector is predicted to grow by another 1 million jobs by 2030?¹ You do now.

This degree will equip you for a successful future career in this exciting and diverse field.

Throughout the programme you'll get opportunities to work with client groups, negotiating, developing and co-producing, enhancing your employability. We also have many partnerships to provide significant opportunities for coaching, shadowing, careers advice and mock-audition sessions.

are in the creative industries¹

Creativity lives and breathes at the University of Hull. Always has done, always will. It's central to what universities do. But at Hull, we're building something that goes far beyond our four walls.

A revolutionary arts education. Where you're free to explore creative solutions to the challenges our industry faces in a post-COVID world.

A technical and practical arts education. To equip you with the talent and business know-how to excel in a wider range of careers.

An arts education for all. No matter who you are, where you come from or where you're going, you too can do what you love - and turn it into a career.

The big arts boom

It's no secret that the global pandemic has taken its toll on the arts. But here's the good news: its future is full of hope.

From drive-in operas to doorstep drama, outdoor cinemas to online concerts, the creative industries have never been so vibrant, inventive and inspiring. Some, like streaming TV and virtual reality, have thrived. While others, against all odds, are still creating, still adapting, still surviving - waiting for the curtain to come up again.

Theatres, cinemas, gig venues, galleries: all are poised to open their doors as the promise of a vaccine and a more 'normal' future looks ever more certain. And as the crowds gather and the demand for life's luxuries grows, so too does the demand for creative graduates.

Now more than ever, the world is looking to people like you: creators, curators, performers and producers. People who can help write the script of an exciting new chapter, and lead the future of the creative industries.

Want to play your part? Find out how...

Criminology and Professional Policing

Want to discover the causes of crime? Want to stand up to injustice? There's no better place to study. Join a thriving subject area where you'll learn about crime, justice and deviance. We've earned a powerful reputation and built strong links with local, regional and national criminal justice agencies.

“ I really enjoyed my time with Humberside Police. At first I was a bit nervous about the whole experience. However, everyone makes you feel really welcome and part of the family! The variety of placement days gave me the chance to transfer my theoretical knowledge from university to practical policing, and really helped me to understand the influences of policing strategies with regards to crime control.

Jade Heredia
BA Criminology and Forensic Science Graduate

We offer stimulating placement opportunities, as well as field trips to courts, police stations and prisons. You could get to go into HMP Hull to explore why and how people involved in crime stop offending. Hear first-hand about the issues that affect prisoners and gain invaluable experience if you're considering a career in criminal justice.

Our expert staff each have their own relevant research specialisms - from modern-day slavery to knife crime, and from domestic violence to cyber crime. They design the modules with you in mind - their research powering their teaching.

Tailor your degree to suit your interests and aspirations. The new BSc Professional Policing will give you the knowledge, skills and behaviours for a career in the police service. You could choose to enhance your study of Criminology by studying it with Psychology, Law or Forensic Science to develop your own specialism. Or you could opt for our BA Criminology and Sociology, where you'll be encouraged to share your own ideas and contribute to debates around the latest events in criminology and the wider social sciences.

You'll have access to a purpose built Crime Scene facility, with flexible spaces providing realistic settings. There are also breakout and write-up spaces to collaborate outside of the crime scene scenario rooms.

92%

of social sciences students in work or further study 15 months after graduating.¹

BSc Professional Policing	112	BBC	M9P4	M931 [†]	
BSc Psychology with Criminology	120 - 128	BBB - ABB	C8M9	C8M8 ^{§†}	

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

[†] All Foundation year students on the BA programmes enroll onto BA Criminology and can transfer to the programme of their choice at the end of the foundation stage.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

📍 Where could this take you?

On these degrees you could go on placement with Humberside Police over the course of a semester. You'll work with different areas of the force, including CSI, the Special Branch Ports Unit, community policing, cyber crime and the custody suite. You'll visit active crime scenes, observe suspect and victim interviews and collect evidence. There are only 10 places available, so it's competitive - but the knowledge and skills you'll gain are genuinely career enhancing.

🎓 Graduate careers

Spotlight on...

Learning Together network

“ Absolutely loved the course - will be deflated when it ends. I felt very human rather than a prisoner and have been helped by brain stimulation.

HMP Hull student

Life inside. From the inside.

Criminology at Hull is part of the national Learning Together network. That's an initiative which brings our undergraduates together with students from within prison to learn alongside each other - and from each other. In Year 3, a small group of selected students go into HMP Hull each week to explore why - and how - people who've been involved in crime stop offending.

You'll be studying alongside inmates doing the module with you, sharing the same learning space and assessments. It'll give you a fresh perspective on criminology and first-hand, front-line experience of a prison environment. It's a chance to meet prisoners and hear about the issues affecting them day to day. All massive benefits if you're considering a career in criminal justice: maybe in the probation service, as a psychologist or working for a charity.

The scheme is breaking down barriers: creating dialogue between two groups who've historically had next to no contact. It's a chance for you to get an insight into the life experiences of people who are often of a similar age with comparable interests, but whose journey has been very different. Our students go in with open minds and have their preconceptions challenged; it also builds their confidence and helps them learn how to make connections with people from all walks of life.

“ For me, Learning Together has not just been a learning process, but also a personal journey. It was obvious there was a good rapport developing throughout the groups, which enabled stimulating conversations and debates. I often found that the HMP students brought forth arguments which I hadn't previously contemplated.

Lauren Kelsall

Criminology with Forensic Science graduate, first class honours

Drama, Theatre and Performance

This is a place - and a university - with a strong commitment to the performing arts. That passion has always been part of our courses at Hull. You not only learn about the theatre, you learn through making theatre.

“ Choose Hull, because you learn so many things that you don't get anywhere else. You don't just act: it's everything in theatre.

My highlight has been building connections with local theatre companies. I'm now on the board for the biggest theatre company in Hull and will be doing my first professional directing job with them.

Fiona Wright
BA Drama and Theatre Practice

Being a drama and theatre student here means being a member of a busy theatre community that performs, creates, communicates and engages with a variety of audiences.

On our BA Drama and Theatre Practice course, you can explore the expertise behind performance while benefiting from loads of opportunities to get to grips with practical performance projects. Our staff always encourage you to pursue your interests. And you'll experience a range of theatre-making opportunities on a weekly basis: from classical to experimental by way of digital, educational and participatory performance.

The Theatre Production pathway of our BA Creative Industries course is ideal if you want to develop the leadership skills needed in the creative industries, as well as the technical and practical skills of theatre production. At Hull you can develop your talents in whichever area appeals to you - whether it's as a performer, designer, creative technician, writer or teacher.

Facilities

Get exclusive access to the Gulbenkian Centre, a purpose-built theatre on campus, with studios and workshop areas. You'll take ownership of this working theatre space while you're studying here - from the costumes department and sound board to the lighting rig and front-of-house duties.

Experience amplifier

While you're here, you'll benefit from our relationships with arts organisations including leading theatre companies Hull Truck, New Diorama London or Middle Child. And we'll continue to support your career even after you graduate, with events such as the annual Gulbenkian Careers and Employability Festival.

➔ Go to page 46 to learn more about our Creative Industries degrees.

Earth Science

Understanding of how geological systems work is crucial to our future on this planet. On an earth science degree at Hull, you'll interrogate the big questions facing us in the 21st century: from sustainability and global resources to climate change and geohazards.

“ The caves of Sorbas were really interesting because there are only five of those locations around the world and they are the biggest in Europe. It's amazing to get these opportunities to come out here.

Almería (field trip) in a sentence... probably the craziest, most interesting week of geology that I've ever done.

Elliott Sanderson
Class of 2019

Our staff are internationally recognised for their excellence in areas such as volcanology, climate change, palaeontology and mineralogy, and this research expertise feeds directly into our teaching. Sustainable geoscience is at the heart of our degree - your learning is grounded in helping to secure the future of our planet.

Field work is essential to our Earth Science course. All our staff teach in the field as well as in labs and lecture theatres (which is rare in a UK Earth Science department). Early in your degree, we make full use of the amazing geology close to Hull, from Yorkshire's wolds and moors to its famous Dinosaur Coast.

We'll then take you further afield. There have been recent trips to locations such as Skye, Spain and Cyprus, while students doing a dissertation have worked independently in regions as diverse as Canada, Greece and Ghana. So an Earth Science degree at Hull really does take you places.

What we offer

Course	Typical offer	Example A levels	UCAS code		
BSc Earth Science	120	BBB	F600	F602 [§]	F601

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications. You also need A level at grade C or above (or equivalent) in one of the following subjects: Biology, Chemistry, Environmental Science, Geography, Geology, Maths and Physics. For A level Biology, Chemistry and Physics, this must include a Pass in the practical element.

Where could this take you?

Earth Scientists are among the most sought-after graduates. Their diverse combination of field, practical and communication skills opens up opportunities in a variety of fields. Our graduates have gone on to work in areas as diverse as engineering geology, palaeobiology, environmental consultancy, and science teaching, as well as studying for Masters and PhDs.

Graduate roles

- Geo-environmental engineer
- Mineral surveyor
- Renewable energies
- Exploration geologist
- Geophysicist

Accreditations

Our BSc Earth Science degree is accredited by the Geological Society of London. So you can be confident you're choosing a recognised degree that will equip you with the technical ability and transferable skills you'll need in your career, providing a route to Chartered Geologist status.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers.

We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

We can also help you build links with, and gain experience from, employers and expert organisations. On our Professional Consultancy Project module, our students have taken on roles from developing practical teaching materials for schools to deciding if East Yorkshire should apply for UNESCO Geopark status. We also bring careers onto campus, with guest lecturers contributing to modules, and employers and alumni taking part in our annual 'Jobs that Rock' careers event.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugearth

Economics

We want everything we teach to have a genuine use in the real world. That's why, on our Economics degrees, you won't just discover economic concepts and analytical tools as part of some abstract mathematical theory – you'll explore how they relate to issues like the impact of public policy on industry and society.

“I heard the Business School had a fantastic reputation, and once I found out about the support you receive once completing your degree, I realised Hull was the place for me. Not only have they pushed me to work hard, but they also have great partnerships with local and worldwide businesses.

I did a placement year with a reprographics firm, Sonoco-Trident. It's given me that head start I need when applying for a career after graduation. It's certainly something I would recommend.

Oliver Witty
BA Business Economics with Placement Year

Designed to be 'hands-on', our programmes cover a wide variety of topical issues, including digitisation and technological change, the development of market economies, social inequality, climate change, financial crises, growth and the effects of pandemics like Covid-19.

The BA Business Economics and BSc Economics courses share a common first year, and then allow you to specialise as you progress. The BA degree focuses on developing a deep understanding of how microeconomics and macroeconomics can illuminate the complexity of the modern business world, and can enable business managers to make better decisions.

The BSc in Economics provides deeper technical tools to assist in mastering the application of economic theory to real-world issues. You can choose to switch between these two degrees in the second year if you wish to.

BA Philosophy, Politics and Economics allows you to gain a wider perspective on modern society, training you to not merely absorb information but to engage, to debate, to influence and to lead.

On our courses, you'll gain a strong skillset of advanced data analysis, graphical illustration and problem solving. Your studies will range from individuals' and businesses' microeconomic choices to the large-scale decisions of government and supranational organisations.

Real-world experience

We connect you to world-leading brands. Hull has links with major international businesses. Get real industry experience on placement with the likes of Bosch, BMW, Siemens and Disney, or spend a year with the Government Economic Service or the Office for National Statistics.

In your final year, you'll also have the chance to spend three months on an internship (that's in addition to the extra option of studying abroad or spending a year on placement in industry). It's an amazing opportunity to apply your knowledge in a real working environment – and enhance your employability at the same time.

Find out more – go to pages 94 and 180 to find out about our work experience placements, and page 34 to discover the Business School.

What we offer

Course	Typical offer	Example A levels	UCAS code			
BA Business Economics	120	BBB	L120	NN1G [§]	L122	L121
BSc Economics	120	BBB	L115	NN1G [§]	L117	L116
BA Philosophy, Politics and Economics	112	BBC	LOVO	L201 [§]		

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

On successful completion (pass) of the BA Business Management Foundation Year (course NN1G), you can either continue with that degree or join Year 1 of any other undergraduate degree in the Business School, subject to meeting any GCSE requirements for that degree.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

Where could this take you?

With a degree in Economics, you'll have a foundation for a variety of careers. You'll find yourself in demand across all sectors, industries and countries, from private companies like Aviva and Coca-Cola to public-sector employers like the Government Economic Service and the National Audit Office.

Graduate careers

- Economist
- Politician
- Journalist
- Data analyst
- Tax associate
- Business manager

Career advice and support

Our careers team will help you learn how to apply for positions and prep for interviews. We also run networking events on campus, which could lead to internships and job offers.

You'll benefit from our Centre for Professional Success too. They'll support you in sourcing relevant placements and employer projects. You'll also get access to our global alumni community, which can help you identify potential mentors and develop your professional networks.

Accreditations

All Hull University Business School degrees have international accreditation from AACSB, which is held by fewer than 5% of business programmes worldwide.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

96%

Education and Childhood Studies

Harness the power of education to change individuals, communities and society at large, through our diverse suite of programmes. You'll learn from tutors with actual professional experience in education and early years settings.

“For as long as I can remember, I have always wanted to work with children, and every day at the University of Hull shows me that the decision I made was a breakthrough in my life.

A remarkable experience was my work placement in Norway. A different culture and approach to early childhood education will certainly support me in the future.

Monika Paulch
BA Early Childhood Studies

Graduate careers

- Teacher
- Researcher
- Youth & Community Worker
- Early Years Graduate Practitioner
- Family Support Worker
- Health Play Specialist

Our degrees offer you the flexibility to pursue your passions, including opportunities to study alongside full-time employment. They cover three main disciplines:

1. Early Childhood Studies
2. Education Studies
3. Working with Children, Young People and Families

On our innovative Education Studies degree, you'll have the opportunity to tailor your course towards a specific career interest through our optional pathways in Special Educational Needs, Disability and Inclusion, Youth and Community Work (JNC Qualification in Youth Work),¹ and Teaching English to Speakers of Other Languages (Trinity Cert TESOL).

Our BA Working with Children, Young People & Families degree prepares you for careers in the wider children's workforce, including early help and family support. On our BA Education Studies degree, you'll have opportunities to gain Graduate Practitioner Status. We also offer routes to Qualified Teacher Status through our Primary Teaching degree and our top-up courses - see page 132-133 for details.

Skills enhancer

You'll engage with learning spaces in and beyond formal educational settings, challenging your assumptions of what education is and where it happens. On all of our degrees, you can opt to study for accredited Forest School certification. That training prepares you to work outside with children, taking into account a range of additional needs and giving you a valuable extra qualification.

¹ We're seeking JNC recognition as a professional youth and community work qualification for this programme, though the validation process is not yet complete.

What we offer

Course	Typical offer	Example A levels	UCAS code

Electrical and Electronic Engineering

Electrical and electronic engineering touches every facet of modern life. And our programmes help you develop the skills to find a varied, challenging and financially rewarding career at the forefront of technology.

“ I chose Hull because of the variety of content within the course that will benefit me when I work in the industry. I came to an Open Day at the University of Hull and the atmosphere was so friendly in the department - I was able to talk to the Head of School and other students. It was just such an enlightened and enthusiastic environment. The campus is great, the people are lovely.

Natasha Pitts
BEng Electrical and Electronic Engineering

You'll be taught by research-active staff with years of experience and invaluable industry contacts. They build their research into our degrees - so you'll get expert teaching of the most advanced ideas. Our courses are designed in collaboration with industry. They combine key skills such as analysis, design and business awareness with a deep understanding of technology to make you attractive to employers. You can explore up-to-the-minute fields including smart power, instrumentation, process control, communications and remote sensing.

Accreditations

Our Electronic Engineering courses were the first in the UK to gain Institution of Engineering and Technology (IET) accreditation. All our degrees are fully accredited and are recognised qualifications towards Chartered Engineer status. BEng courses fully meet the academic requirements for registration as an Incorporated Engineer and partly for Chartered Engineer registration. MEng degrees fully meet the academic requirements for becoming a Chartered Engineer.

Facilities

Our facilities mean that you'll be trained using the latest techniques and equipment. For example, you'll be able to work in our embedded systems labs, robotics labs and 3D printing lab, where you can design and manufacture models and prototypes and then test them.

What we offer

Course	Typical offer	Example A levels	UCAS code		
BEng Electrical and Electronic Engineering	112	BBC	H604	H620 [§]	H608
MEng Electrical and Electronic Engineering	128	ABB	H605		H611

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications. You also need A level Maths at grade B or above (or equivalent).

Where could this take you?

The mathematical capabilities, problem-solving skills, ability to understand innovative concepts and experience of working in teams that you gain as an Engineering graduate are much in demand. Our graduates have gone on to work with companies such as Alstom, BAE Systems, Corus, GlaxoSmithKline, the armed forces and the Health and Safety Executive.

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers. We can also get you into the room with a range of employers at on-campus events. English and Creative Writing

Become a thinking writer: one who identifies and harnesses the power of words to bring about positive change. At Hull, you'll work on projects linked to real-world situations, with themes of sustainability, collaboration and community running throughout.

“The highlight of my course has been everything! I thoroughly enjoy studying English at Hull - the modules have all been excellently put together and the staff have made the whole experience interesting and enjoyable.

I've grown as a person more than I ever expected to. I feel a lot more confident now than when I started and I enjoy pushing myself to do things that are out of my comfort zone.

Maya Tyrrell
BA English

All our degree programmes deliver strong personal and professional skills, and give you the opportunity to explore vibrant topics, such as crime, the environment, and Gothic writing.

Your study of English will take you around the world on travels in text and time. You'll explore prose, poetry and drama from the Renaissance to the contemporary with expert teachers and critics, and engage with literature which speaks to urgent issues of the day.

On our Language and Literature degree, you'll also learn the art of effective communication and analyse how language influences everything from business to political discourse and social media. This programme delivers excellent employability skills, including for those who want to become English teachers and increasingly need to demonstrate knowledge and understanding of both language and literature.

Our Creative Writing courses focus on honing your craft through a mixture of practical workshops and seminar discussions. You'll have the opportunity to write in a range of forms, from prose to poetry, scriptwriting to non-fiction, increasing your confidence and developing your style and verve. As practitioners and published authors, our tutors bring their expertise and creativity into each session.

And you'll find plenty of opportunities to make your mark - with the active, student-led English Society, WriSoc and HU Writes. You can contribute to our student-run publications, The Hull Scribbler and Document 1. You'll also get the chance to participate in our termly Writing Showcases, which are organised by our students and celebrate our students' work.

Environmental Science

The world needs environmental scientists to understand and manage the environmental issues we face. This degree will help you develop a deep understanding of the complex forces shaping our planet and give you a thorough theoretical and practical grounding in the elaborate nature of environmental systems and our relationship with them.

“ Environmental science is a thought-provoking subject that leaves you with no end of questions that lecturers are more than happy to answer. It helps expand your knowledge of the environmental processes that are going on around you and allows you to get hands-on.

The lecturers and staff go out of their way to give you the support and help you need to make your experience on the course and at university the best it can possibly be. It truly is a great place to study.

James Cameron
BSc Environmental Science

The programme draws on our expertise in biology, geography and earth science to make a truly interdisciplinary degree - with practical skills embedded throughout. The first two years concentrate on the core knowledge you need to understand environmental processes, systems and human impacts, as well as key scientific skills such as experimental design, data management and analysis. The optional modules mean you can specialise in specific ecological, chemical or physical aspects of the environment.

Your final year largely involves a research project (on a subject that you'll pick) and specialist modules for learning the environmental skills needed in this sector. The core Environmental Impact Assessment module and the optional field studies give you the chance to apply your skills in a choice of settings and destinations.

This university cares deeply about the environment and a strong, sustainable future for everyone. The University has announced an ambitious plan to become carbon neutral by 2027, which marks our centenary year (find out more on page 12-13).

Accreditations

Our Environmental Science course is accredited by The Institution of Environmental Sciences. This means you can apply for free student membership of The Institution of Environmental Sciences (IES), and for a fast-track route to membership after graduation - starting you on the route to becoming a Chartered Environmentalist or Chartered Scientist.

What we offer

Course	Typical offer	Example A levels	UCAS code		
BSc Environmental Science	120	BBB	F751	F757 [§]	F753

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications. You also need A level at grade C or above (or equivalent) in one of the following subjects: Applied Science, Biology, Chemistry, Environmental Science, Geology, Geography, Maths or Physics. For A level Biology, Chemistry and Physics, this must include a Pass in the practical element.

Where could this take you?

You'll accumulate a blend of field and lab skills and expertise in environmental monitoring and impact assessment processes. That'll make you an excellent candidate for organisations like the Environment Agency, environment consultancies, local councils or wildlife trusts. The programme is also an ideal platform for further study.

Graduate careers

- Environmental consultant
- Environmental regulator
- Conservation worker
- Environmental researcher
- Teacher

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers.

We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

World explorer

Throughout the degree, you'll spend much of your time conducting field work and research. That'll be backed up by lectures, tutorials, seminars and opportunities for residential field courses in the UK and abroad. Recent trips overseas have included Mallorca, Brazil and Malaysia (an extra fee may be payable in these cases).

Top 3

in the UK for research impact in geography and environmental studies¹

¹ Research Excellence Framework, 2014.

Skills enhancer

You can learn to dive alongside your degree. You can become a PADI certified Advanced Open Water Diver (extra fee may be payable). You'll develop specialist skills such as underwater navigation and photography, that could help your career prospects.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugenvsci

Film and Media Studies

All our courses teach hands-on skills as well as thought-provoking theory. If you're passionate about film, you'll explore the practical side of filmmaking while studying its history and culture. Or if media studies is your thing, you can master production skills while exploring the relationship between media and society.

“ Creative Writing and Film Studies is a good combination for anyone looking to write for the screen. In my writing modules, I've had the invaluable experience of constant peer feedback.

The film studies side has given me a much broader perspective on media and storytelling. The third-year screen production project was a chance to combine both sides of the course, and to put back together what we've broken down in class and in essays.

Daniel Ramsøy
BA Creative Writing and Film Studies

On our Media Production degree, you'll learn production techniques - in the studio and on location - as well as skills in post-production, legal and licensing knowledge and how to navigate the opportunities and challenges of the industry.

As the region grows in popularity as a film location, so do opportunities to get experience on a placement. Some might arise through our involvement with Screen Yorkshire's Connected Campus: a scheme which can help prepare you for life in the film and TV industry through masterclasses, workshops and visiting speakers. You'll also get extensive access to on-campus TV, film and media facilities.

On our Film Studies courses, you'll be taught by enthusiastic, knowledgeable staff who are fans as much as they are academics. They include Dr Amy Davis, an internationally respected Disney scholar, as well as experts in horror, East Asian cinema and TV drama.

Facilities

A new dedicated Digital Media Centre, offering a flexible and practical learning environment. Featuring a virtual reality lounge where you can fully immerse yourself in visual and audio experiences, including the opportunity to walk inside your own creative designs. Plus fully-fitted PC and Mac design labs and studios using the latest hardware and software, as well as spaces for events, presentations and group learning - all featuring high quality audio visual and IT teaching systems.

Game and Graphic Design

Studying under experts who've worked on BAFTA-winning games, you'll gain the practical, critical and creative skills to succeed in the games industry. And beyond.

“I loved how much the teaching staff all bring to the table. If I ever had a problem, the lecturers all come from various backgrounds in industry; they share knowledge and resources to help students learn. The course is great for teaching you the necessities and giving you the foundations to make something great.

The University gave me the confidence and skills I need and I'm now a designer at a video game development studio in Leeds.

Ryan Connor,
BA Games Design Graduate 2019

To help you develop your talents and build your skills, we offer industry-standard hardware and software on Mac and PC. You'll use it to create graphics, illustrations, 3D characters, 3D worlds, animations, games and videos.

The Virtuix Omni VR treadmill (find out more on the next page) allows you to walk inside the virtual worlds you create. You'll also get access to Viper - the highest-spec computer at any university in the North of England - for lightning-fast, high-quality 3D rendering.

On our Game Design degree, our close links to game companies and industry networks mean that you'll be able to take advantage of opportunities including study trips, visits from guest speakers, game jams and an optional year in industry.

On our BA Graphic Design degree, you'll learn about visual design, creative thinking, typography, the use of colour and composition and design history - and how to apply this knowledge through 2D and 3D design, web applications, animation and other evolving media.

Experience amplifier

Our links to regional media organisations can improve your job prospects through placement opportunities. We've also formed a link with Game Republic, which means you could take part in the annual Game Republic Student Showcase - presenting your final-year project to industry professionals and competing against teams from other universities. The optional year in industry on our Game Design degree is a chance to sharpen your skills in a real-world setting and make valuable contacts for your future career.

A virtual learning experience

Level up

On our Game Design degrees, you'll be able to design virtual environments using 3D and game engines. We're also one of the first universities in Britain to extensively use a virtual reality motion platform: the Virtuix Omni treadmill. So you can create virtual environments, then walk inside them and experience your own designs. Motion platforms are becoming the industry standard in areas such as e-sports, but also have a place in manufacturing industries - helping to deliver more effective health and safety training. This is giving our students valuable real-world design experience working with companies in the Hull area.

“ Games Design has always been a big passion for me and the course allows us to get a hands-on experience in creating game environments, game design concepts and art, experimenting with 3D design and creating 3D animated characters for storytelling and gaming.

My favourite part of the course has been the opportunities to apply my own art and express my creativity. The teaching staff are highly supportive and welcoming. They are always willing to help and assist, and give honest and constructive feedback. They open up many opportunities to students that they may otherwise have not been able to take.

My experience has been an exciting rollercoaster of new experiences and opportunities - and a great release of artistic freedom.

Amy Garden
Game Design Graduate 2019

Geography

At Hull, you can tackle the major challenges facing people and the planet, from globalisation to climate change, at a university that's ranked third nationally for its geography research impact (REF 2014). You can apply your knowledge to the real world through our strong emphasis on field trips, both in the UK and abroad.

“ When I came to an Open Day, everyone was so friendly and helpful - Hull was somewhere I needed to study. Before coming to the University, I visited the campus about six times in one year because it just had something about it that I wanted in on as well. Also the field trip opportunities that are available at Hull weren't available elsewhere.

Rhianna Phillips,
BA Geography

You'll get individual academic support throughout your degree, building to your final-year dissertation - when you can follow your own research interests in geography. We also offer opportunities for consultancy projects with external partners.

The teaching on our degrees is skills-based, geared towards employability. In the first year, both our Geography degrees provide you with an overview of human and physical geography, as well as developing key geographical skills. Then in the second and third years, you'll get a choice of what you want to study, so you can really tailor your degree to your interests. You can decide to specialise in human or physical geography, or continue to do a mixture of the two. Human geography topics you can pick from include sustainability, development, cities and globalisation. Physical geography choices include hazards, climate change, conservation and rivers.

You'll also have the option to study abroad for a year at one of our partner universities - including destinations in the USA, Australia, Singapore, and around Europe.

Field trips

Going places

At Hull, you get more than in-depth teaching. We're big believers in field trips, both in the UK and abroad. They're a brilliant way of honing your geographical skills while studying the places, people and processes that make up the world we live in.

From local day trips to residential courses in Europe, Africa and Asia, we offer a diverse and stimulating range of field work. Our trips could have you studying glaciers and volcanoes in Iceland, comparing waterfront regeneration in Hull and Barcelona, or exploring Yorkshire's 'Jurassic Coast'.

Hull is a great location for field work. East Yorkshire gives access to some fantastic teaching and dissertation research sites, including dynamic coastal and fluvial systems, urban regeneration areas, rural environments and Ice Age landscapes.

Besides the adventure of travel, field trips bring plenty of other advantages. They add depth and perspective to what you learn in lectures and the lab. They develop abilities that'll help you map out your future - whatever your career path. They're a big part of making the most of your university experience.

In fact, we think learning on location is so essential that we make sure the cost of all core field trips in your first two years is covered by your course fees. That's right: they're already paid for.

So there's nothing stopping you. Come and discover Hull. Then discover the world.

“Geography is definitely the best. We got to do a whole course on Barcelona. What other course is going to let you study a place in such depth? It's so different to anything else, which is one of the main reasons I wanted to go to Hull.

Millie North
BA Human Geography

Health, Nursing and Midwifery

If you're passionate about making a difference to someone's life, then you've chosen the right place to study. At Hull you'll benefit from learning in our £28m award-winning medical building. With a simulated operating theatre, hospital ward and intensive care facilities, our students train in a realistic setting from the start.

“ As part of my degree, I went on some amazing placements in critical care, medicine and surgery. They really helped me prepare for my job role as each placement has provided me with skills which help me manage working in such a fast-paced environment. The knowledge which I picked up on these placements has been invaluable to me. Healthcare gives me the opportunity to really be the best person I can be.

Sophia Taylor
BSc Adult Nursing Graduate

We'll give you the skills, expertise and support to become a confident, compassionate professional health practitioner. You'll split your time between learning in classes and in full-time supervised and assessed clinical placements. And you won't have to wait to get practical experience - placements start right from Year 1.

The breadth of our healthcare courses continues to grow. Our new Physiotherapy degree has been developed at the request of local healthcare providers to meet a shortage of physiotherapists. This follows the launch of BSc Paramedic Science in 2017, developed with Yorkshire Ambulance Service to meet a local shortage of paramedics.

We also have programmes that empower you to care for women throughout pregnancy, birth and the post-natal period or look after critically ill babies, children or adults. You can train to support people with learning disabilities or mental health needs, or to protect the health, dignity and emotional wellbeing of patients before, during and after surgery. Or you could learn how to treat and stabilise patients at the scene of an accident or emergency.

And if you're already working in a professional setting, we have courses to enhance your existing healthcare skills. From childcare support and financial scholarships to additional academic support if you need it, nothing should be a barrier to you realising your dream.

➔ **Please turn over** to find out more about the amazing facilities you could learn in.

What we offer

Course	Typical offer	Example A levels	UCAS code
BSc Midwifery	120	BBB	B720
BSc Nursing (Adult)	112	BBC	B740
BSc Nursing (Child)	120	BBB	B730
BSc Nursing (Learning Disability)	112	BBC	B761
BSc Nursing (Mental Health)	112	BBC	B760
BSc Operating Department Practice	112	BBC	B990
BSc Paramedic Science	120	BBB	B780
BSc Physiotherapy	128	ABB	B160 [†]

For BSc Operating Department Practice, your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications. For all other courses, points should be from three A levels or equivalent.

[†] You also need A level at grade B or above (or equivalent) in Biology, Human Biology, or Physical Education. For A level Biology, this must include a Pass in the practical element for reformed A levels completed in 2017 or later.

£ Extra funding

Undergraduate students studying nursing, midwifery, paramedic science and physiotherapy will receive a payment of at least £5,000 a year. You don't need to pay this back, and you'll get it as well as your student loan.

Where could this take you?

By the end of your course, you'll be ready to undertake the responsibilities of a health practitioner. Most of our graduates go on to work in the NHS - but others find positions overseas, in private practice, in the social services, the pharmaceutical industry, the armed forces, the prison service or in specialist areas such as drug rehabilitation.

IELTS requirements

Health, Nursing and Midwifery have their own IELTS requirements. For the latest programme-level details, please visit our website.

Approvals

Our courses are approved by professional and regulatory bodies including the Nursing and Midwifery Council (NMC) and the Health and Care Professions Council (HCPC).

Allam Medical Building

The beating heart of Hull

Opened in November 2017 by Her Majesty The Queen, the Allam Medical Building is one of the finest training facilities in the country, and its quality is matched by the breadth of the courses we offer.

The beating heart of our £28-million health campus project, the building houses a simulated learning environment, including a simulated hospital ward, operating theatre, midwifery-led birthing unit, intensive care unit and resuscitation unit. So right from the start, your training will unfold in an authentic setting - giving you the skills and the confidence to do the job when you eventually do face genuine front-line situations. You'll also be learning side by side with other healthcare practitioners, preparing you for future careers working together.

And really, that's the whole point. This is a facility that exists to make an extraordinary difference - and it is doing just that.

We train outstanding graduates to address the shortage of doctors, nurses and healthcare workers. We're helping pregnant women and new mums with a radically different service to diagnose mental health issues and access to better care. Our partnership with Yorkshire Cancer Research is tackling cancer inequalities in the region. And our Wolfson Palliative Care Research Centre is helping those with life-limiting conditions live as well as they can and giving them courage and control when the time comes.

**Real people. Real lives.
Real solutions.
Really want to be part of it?**

The AMB lighting up blue to celebrate 70 years of the NHS.

The Allam Medical Building was the winner of the 'Buildings that Inspire' category in The Guardian's University Awards 2018.

History

Join us on a journey to gain historical knowledge, communicated through the latest technology - seeking to tackle today's most pressing local, national and global challenges. We balance the thrill of fresh discoveries with looking at familiar topics while teaching the analytical skills that employers value.

“ There's such a deep history here in Hull... I don't think people realise. And this influences the modules you study. Once I realised that, I knew that I'd be in the ideal place for my course.

I'm really proud to study here. I'm really proud that I've got on a really good course and I've made really good friends and I've done really good things. And when people talk about Hull in general, I just get really excited.

Holly Cockerham,
BA History with Foundation Year Graduate

You're at the heart of our degree programme and will have the opportunity to forge your own study journey. We use the social, political and environmental challenges of the contemporary world as our starting point for exploring history. This creates a fascinating way of navigating the past from classical civilisations to modern communities.

Our assessments aim to reflect the real world, so you won't have exams but may have some time limited tasks. You'll be encouraged to express your ideas in a variety of ways, to criticise sources of historical information from newspapers to computer games, and develop your own ideas through channels such as podcasts or online exhibitions.

Throughout your studies with us, you'll develop key techniques for historians, gaining transferable skills of digital literacy, and teamwork and communication. This will equip you for the workplace and enable you to create a brighter future for yourself and the world we live in, fuelled by your passion for history.

You'll have opportunities to work with local museums, archives, community groups and galleries, including curation of the University's own gallery space, and develop skills for independent research and digital literacy.

Facilities

You'll benefit from the resources of a city that's steeped in history - with access to the Hull History Centre, the Blaydes Maritime Centre and the world-renowned Wilberforce Institute for the Study of Slavery and Emancipation. And of course there's the Brynmor Jones Library - open 24/7 during term time and housing more than a million books, journals and periodicals.

➔ **Please turn over** to find out more about how Hull's own story enriches our courses.

Spotlight on...

Hull's local history

Hull is history

For a city of moderate size, Hull's had quite the influence on the country's - even the world's - history over the years.

There was the refusal to allow King Charles I entry to the city in 1642, which was one of the spark points for the English Civil War. The women of Hull's fishing community, whose fervour and fury at the poor safety conditions their menfolk faced at sea rippled all the way to Westminster and brought about an act of Parliament. The 19th-century Eastern European emigrants - stopping off here while seeking passage to New York - who took a shine to Hull and ended up sticking around, enriching the city's cosmopolitan feel. Amy Johnson, the woman from Hull who became a pilot and rewrote the record books, not to mention redrawing the gender landscape. And of course, William Wilberforce: the Hull MP who campaigned for more than 20 years to abolish the UK's slave trade.

Whichever way you slice it, this is an historically relevant location. So you'll have areas of interest - and the resources to research them - right on your doorstep.

“ For over 700 years, Hull has been a key port in Britain: playing a key role in regional, national and international life. Founded by a king, shaped by international commerce, it retains a strong cultural identity. Hull people have a tradition for standing up and making a difference. We continue to shape agendas that matter.

Dr Nick Evans
Lecturer in Diaspora History

Law

Want to make a difference in people's lives? Fight for what's right and make a real change in the world? Then Law at Hull is for you. And this is not a typical law school. We offer a personal experience: here, every student counts.

“ I couldn't recommend Hull enough. It has everything: amazing student experience, city life, an amazing, well-kept campus, a supportive network of students as well as personal tutors and subject societies which are key for helping with your studies.

The Law School provides students with lots of opportunities like competitions, career fairs, trips and talks, such as when Lady Hale visited. I wouldn't want to be anywhere else.

Sophie Crane
LLB Law

Law at Hull enables you to develop valuable skills and provides a foundation for your legal career. We don't just teach you the legal theory - we encourage you to research, engage with and question the law in its social, moral and political contexts. You'll learn how to use the ideas, values and policies that shape the law to make a difference in your career in and beyond the legal profession.

You can choose modules in legal specialities including criminal justice, international law, company and partnership law and family law. Our lecturers are experts in the field: their research not only informs our course content but also has a powerful influence on policy, regulatory change and public debate.

Our vibrant Student Law Society has a programme of events and competitions - in mooting, negotiating and client interviewing - that'll give you new skills and improve your confidence. Our new mock court is another way that we've created a realistic environment for you to gain experience of practice. You'll also have the opportunity to study abroad - for a year or during the summer - at one of our highly ranked partner institutions, in countries including France, Germany, Denmark and the Netherlands.

90%
of students in work or further study 15 months after graduating.¹

What we offer

Course	Typical offer	Example A levels	UCAS code		
LLB Law	120	BBB	M100	M102 [§]	M103
LLB Law (Senior Status)	†	n/a	M101		
LLB Law and Legislative Studies	128	ABB	ML12		
LLB Law with Business Management	120	BBB	M1N1	M102 [§]	M1N2
LLB Law with Criminology	120	BBB	M1M2	M102 [§]	M1M3
LLB Law with Politics	120	BBB	M1L2	M102 [§]	M1L3
BA Criminology with Law	120	BBB	M9M1	M931 [§]	

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

[†] Second class honours degree in a non-law subject.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

Where could this take you?

We're all about preparation for your career. In fact, we've won awards for the way we encourage students to engage with clients in real-world situations. So you'll find plenty of practical modules, internships, placements and other work experience opportunities. The skills and knowledge that you'll acquire here can open up careers in roles both inside and outside the legal field. All of our LLB programmes include the foundations of legal knowledge which are essential if you intend to go into legal practice.

Graduate careers

- Solicitor
- Barrister
- Legal executive
- Banking and financial services
- Journalism
- The armed forces
- Politics

Career advice and support

Our careers team will help you learn how to apply for positions, prepare for interviews and impress potential employers. We also run networking events on campus, which often lead to internships and job offers.

You'll benefit from our Centre for Professional Success too. They're a key point of contact for helping you to develop your employability skills, such as the opportunity to take part in the Legal Advice Centre. You'll also get access to our global alumni community, which can help you identify potential mentors and develop your professional networks.

IELTS requirements

6.5 overall with no less than 5.5 in each skill. See page 190 for more details.

Spotlight on... the Legal Advice Centre

“ Just to say how pleased I was with the students and how quick they provided me with answers to my questions. Once again many thanks.

Legal Advice Centre Client

 Laura Milner, Director of the Legal Advice Centre, and LLB Law student Misba Ahmed

Legal basis

As a potential future lawyer, you'll need to get as much hands-on legal experience as you can. Having that on your CV shows a real commitment to a career in law and a genuine interest in practice. At Hull, you get the chance to start building up practical experience before you even graduate with our Law School's Legal Advice Centre.

Supervised by University staff who are qualified lawyers, and supported by our dedicated Centre for Professional Success, you'll provide free, confidential and independent legal advice to members of the community. You'll deal with real cases from members of the public in a range of areas: consumer rights, family, employment law, housing and property issues, and welfare benefits.

It's an opportunity to develop some of the fundamentals of lawyering – interviewing and dealing with clients from diverse backgrounds, practical legal research, assembling a case, and offering reliable legal opinions. And here's the really good part: working in the Legal Advice Centre also counts towards your final degree mark.

So far, the centre's helped more than 1,000 people – and our students have made a huge difference to the lives of many of their clients. They've advised clients on issues from divorce and property rights to appealing a benefits decision. It's not only a brilliant way to learn, it's an important part of our contribution to the community.

“ I've definitely gained confidence through doing this – just being able to go and talk to somebody you've never met before and bring them in, sit them down and lead an interview with them, has helped a lot. It's not an experience you really get elsewhere.

Joe Wignall
LLB Law

Marine Biology

Study life beneath the waves on this exciting course which includes optional, subsidised PADI advanced scuba dive training. You'll get hands-on experience as you learn and get involved in research that's making a difference to our world and the people on it.

“ This degree has been about so much more than theoretical work in the lecture theatre; there are so many practical elements that give you hands-on experience and the chance to put your new skills to the test. You're always out in the field.

Hannah Lightley
Marine Biology graduate 2019

Skills enhancer

Our degrees are built around skills that employers value: organism identification, managing aquatic resources, and communication skills, for example. You can also learn to dive during your degree. Choose subsidised dive training as part of our Ecology module and become a PADI-certified Advanced Open Water Diver (extra fee may be payable).

Our Marine Biology programme is highly interactive, with core teaching in marine biology, evolution, biological diversity, ecology, threatened marine habitats, oceanography, and geographical, environmental and earth sciences. You can also choose options including genomics, physiology, vertebrate zoology, animal behaviour, conservation and Environmental Impact Assessment. This allows you to build a course that suits your interests and ambitions.

Excellent teaching is highly valued here. Hull is the only university in the world to have two winners and one finalist in the Royal Society of Biology's Higher Education Bioscience Teacher of the Year Awards. Our staff have a range of research interests, which makes for a wide choice of final-year projects - when you can specialise and contribute to real research.

We pride ourselves on our blend of lab and field-based practical teaching, and we work across disciplinary boundaries to try to solve global issues. Our facilities include a suite of aquaria housing tropical, coldwater, marine and freshwater species, which you can use for research as part of your degree, and flexible teaching labs supported by technicians dedicated to developing your skills. We also have access to Yorkshire's unique Jurassic Coast, comprising sweeping sandy bays, rocky shores, chalk cliffs and reefs and their amazing seabird colonies.

96%
of students in work or further study 15 months after graduating.¹

¹ UK domicile full-time first degree leavers, Graduate Outcomes survey for the academic year 2017/18, published by HESA 2020.

What we offer

Course	Typical offer	Example A levels	UCAS code	
BSc Marine Biology	112 - 120	BBC - BBB	C160 [†]	C164 [§]

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

[†] You also need A level Biology or Applied Science at grade C or above (or equivalent), including a Pass in the practical element in Biology for reformed A levels completed in 2017 or later.

Where could this take you?

The field, analytic and lab skills you'll learn here are much in demand, and you'll get the chance to engage with potential employers in a range of local organisations and businesses.

We also offer a practical Biology with Education module to final-year students, many of whom go on to postgraduate teacher training.

Graduate roles

- Conservationist
- Marine planning and management
- Fisheries officer
- Environmental consultant
- Marine zoologist
- Diver / dive instructor

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers.

We can also get you into the room with employers at on-campus events. Networking helps you plan your career and can open doors to internships and job offers.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

Accreditations

Our degree is accredited by the Committee of Heads of Environmental Sciences (CHES), the education committee of the Institute of Environmental Sciences (IES). That's an assurance that the course meets high standards, contains strong practical, field and theoretical components, and has excellent training and work experience opportunities, plus links to the professional sector. It also means you can apply for free student membership of the IES and be fast-tracked to full membership once you graduate - starting you on the route to becoming a Chartered Environmentalist or Chartered Scientist.

World explorer

The field work opportunities are exceptional. The exact destinations depend on your course, but recent overseas trips have included Mallorca, Brazil and Malaysia (extra fee may be payable). We're also inside the Yorkshire Nature Triangle, giving you access to some of the UK's most interesting and important aquatic habitats.

Why is there a range of points for the course I'm interested in?

If you apply for one of these programmes, you'll receive an offer that aligns to your predicted points.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugbio

Spotlight on... Dive training at university

Dive in

You don't need to be a diver to be a marine biologist... but why wouldn't you? Most of our Marine Biology students opt to take the Dive Training option within the Ecology module (but it's also available on our Biology and Zoology courses too).

The subsidised course trains you from novice level to Open Water and then to Advanced Open Water Diver.¹ In classroom sessions, you'll learn about safe diving practice, equipment, good techniques, diving and the law, and scientific diving. You'll then perfect your skills in the pool with professional instructors. Once you're ready, you'll put all that training into practice in the open water.

During your second year - and on our final-year trip to Egypt - students wishing to train as scientific divers in the UK continue their training to rescue diver level with Scuba Dream or the University Union Subaqua Club. On the field trip, you'll complete dives on pristine coral reefs in crystal-clear waters while you continue your scientific diver training - working together to collect data using transects, quadrats, observation and cameras. Back on shore, we'll teach you how to develop a scientific dive plan and how to collate and present your data.

We encourage you to continue your training - developing your experience so that you can qualify as a European Scientific Diver (someone who has the training and experience to be part of a scientific diving team).

Our graduates may use their qualifications professionally (as scientists, divemasters or dive instructors) or may just choose to continue to enjoy diving on vacation. Either way, they leave with amazing memories of their experiences at Hull - and have something on their CV that helps them to stand out from the crowd.

¹The cost is £550 for everything: training, transport, equipment, manuals and diving licence.

“ One advantage of learning to dive is that it allowed me to get involved in scientific diving research projects across the world from the UK, Ireland, Cuba, Madeira and Malaysia to running a recent research project on lobster populations on the remote Atlantic island of Saint Helena. The skills I gained opened doors to a challenging and satisfying career as a marine and fisheries scientist.

Michael Roach
BSc Marine Biology Graduate
Fisheries Scientist, Holderness Fishing
Industry Group

Marketing

Discover how to apply what you learn to real-world scenarios from day one on this practical course. You'll learn the latest marketing concepts, trends and practices including social media and customer insight, while getting a faster route to your dream career due to our accreditations.

“ From day one, the course, the University and staff have been student-focused which allows everyone to develop and thrive. Being able to knock on a lecturer's door if I had a question, or visiting the Centre for Professional Success if I wanted support with a job application, meant I felt like I could achieve anything!

I met so many new people and had plenty of great experiences that meant it was the best four years of my life.

Josh Morablanco
Assistant Brand Manager, Young's Seafood, BA Marketing Graduate 2019

We guarantee live projects with our business partners (recent examples include working with Team GB, Young's Seafood, Greencore Group, Whitby Seafoods, Rix Petroleum, AAK and McCain Foods), which builds your experience and often leads to internships.

Our staff bring enormous experience and passion to their subjects, offering a practical hands-on approach across the courses. And our students have also been supported to achieve success in the Chartered Institute of Marketing's national competition, 'The Pitch' (reaching the national finals) while our staff received the Best Student Engagement Award for two consecutive years.

Accreditations

We're accredited by the Chartered Institute of Marketing (CIM). That means you'll be eligible for student membership of the CIM. You can get exemptions from professional qualifications, access to a wider marketing network and invitations to professional marketing events. All Hull University Business School degrees have international accreditation from AACSB, which is held by fewer than 5% of business programmes worldwide.

➔ **Find out more** – Go to pages 94 and 180 to find out about our work experience placements, and page 34 to discover the Business School.

What we offer

Course	Typical offer	Example A levels	UCAS code	👥	✈️	🏢
BA Marketing	112	BBC	N500	NN1G [§]	N550	N502
BA Business Management and Marketing	112	BBC	NN15	NN1G [§]	NNC5	NN1M
BA Marketing and Management	112	BBC	N504	NN1G [§]	N551	N503

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

On successful completion (pass) of the BA Business Management Foundation Year (course NN1G), you can either continue with that degree or join Year 1 of any other undergraduate degree in the Business School, subject to meeting any GCSE requirements for that degree.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

Where could this take you?

With marketing skills backed up by a broad business knowledge, Hull graduates are highly employable in a range of organisations. Some of our previous students have taken up roles at companies including Kelloggs, Siemens, Heinz, Nestlé, Asda and Young's Seafood.

Graduate careers

- Marketing manager
- Social media executive
- Digital marketing executive
- Public relations executive
- Product manager
- Brand operations executive

Career advice and support

Our careers team will help you learn how to apply for positions and prep for interviews. We also run networking events on campus, which could lead to internships and job offers.

You'll benefit from our Centre for Professional Success too. They'll support you in sourcing relevant placements and employer projects. You'll also get access to our global alumni community, which can help you identify potential mentors and develop your professional networks.

96%
of students in work or further study 15 months after graduating.¹

¹ UK domicile full-time first degree leavers, Graduate Outcomes survey for the academic year 2017/18, published by HESA 2020.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

Flexible approach

In Year 1, you'll take modules that are common across the whole Business School. This gives you a solid base of business knowledge and be well-equipped to influence business decisions as a marketing specialist. It also means you'll be able to focus on a specific area or change direction in your second year, if you want to.

Spotlight on...

Industrial placements and support

Time to get ready for work

That's what we do. We get you ready for work. For a career. Either as part of your course or over your summer break, the placements and internships you can access through our Business School degrees are amazing chances to gain relevant work experience. You'll develop specific business and general professional skills, and you'll be able to take what you learn back onto your course.

Recent placements have included Siemens Gamesa: a leader in the renewable energy industry, providing offshore and onshore wind turbines. Our students have also completed placements at major-league players like Intel, BMW, Disney, Sony, Morgan Stanley, IBM, Bosch, Jaguar Land Rover, Phillips 66 and the Government Economic Service.

Before and during your placement, you'll get a high level of support from our Centre for Professional Success. It's staffed by a dedicated team who focus on getting you ready for your first step into the professional workplace. They offer advice, help to create an effective CV, and interactive interview practice - all helping you to develop the skills to ace recruitment and selection processes.

And the support doesn't end after you've graduated. There's access to a variety of online resources for your continuing professional development, as well as face-to-face networking opportunities and industry events.

➔ **Go to page 34** to read more about our Business School.

“ It's been a great experience, this placement year so far. I've learnt so much. And I've had a lot of responsibility, which has actually surprised me.

I've really noticed a change in myself: I'm a lot more confident and I've really developed as a person.

Sam Fenton
BSc Supply Chain Management,
on placement at Siemens
Gamesa

“ It's helped me focus on what I want to do in the future. It's been a fantastic opportunity: it's really helped me develop and added extra value onto my course.

Josh Morablanco
BA Marketing Graduate 2019,
on placement at Siemens
Gamesa

Mathematics

Mathematics is more than just numbers. It's an exploration of universal truths. At Hull, under the expert guidance of our staff, you'll work on projects that will push and develop your abilities at the frontier of mathematics.

“ There are a wide range of different modules to choose from, so the course is nicely split between the different types of maths. There's a lot of work to do but it's worth it - it's a good course. I've changed a lot personally, I've come out of my shell, and the people I've met at the University have helped with that.

It makes me feel proud when people talk about the University and Hull - because I'm there. I'm *part* of it.

Katie Smith
BSc Mathematics

At Hull, you'll explore a range of topics in pure and applied maths, probability and statistics. We start with a core programme covering the foundations of mathematics and its applications. As the course progresses you can tailor your programme by specialising in areas that interest you.

You'll learn in small groups as part of our close-knit mathematical community. And you'll have regular tutorials throughout your degree, where you can raise questions and explore concepts in discussion with your peers. In short, this is a maths degree with a personal feel.

Our degrees prepare you for your future career by encouraging conceptual and abstract thought. On our modelling modules, you learn how to apply your mathematical skills to solve real-world problems and communicate the results effectively.

Facilities

We've got well-equipped computer labs with access to powerful maths software, such as Python, MATLAB, Mathematica and Maple. You'll learn to solve mathematical problems using computers: programming is an important part of all this course. And you'll learn how to prepare professional maths documents using LaTeX.

Budget booster

Good A levels (128 UCAS points including 48 points from A level Maths or equivalent) mean that you'll qualify for the Gillian Stead Bursary, which is worth £2,100 to first years from the UK or the EU. Subject to results, you'll receive further awards of £2,100 in each year of your degree.

What we offer

Course	Typical offer	Example A levels	UCAS code	
BSc Mathematics	120	BBB	G100	G104 [§]

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications. You also need A level Maths at grade B or above or equivalent.

Where could this take you?

A maths degree is highly valued by employers. It opens doors to varied and financially rewarding roles. Our degrees have a strong career focus, giving you the necessary competencies to succeed in a variety of jobs. At the end of the BSc, you could transfer onto our one-year taught mathematics MSc, which lets you access careers that require a postgraduate degree.

Graduate careers

- Banking and finance
- Data analysis
- ICT
- Accountancy
- Insurance and actuary
- The Civil Service
- Engineering
- Numerical computing
- Teaching

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers. We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

Accreditations

Our maths degree is accredited by the Institute of Mathematics and its Applications, and is the first step towards Chartered Mathematician status.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

93%

of students in work or further study 15 months after graduating.¹

Mechanical Engineering

We'll give you the knowledge base and problem-solving skills to unlock solutions that make people's lives better - from manufacturing and the medical sector to the automotive, aerospace and construction industry.

“ While I was looking for universities around the UK, I had two criteria in mind. The first was the range of modules and the second was the campus life. Hull University has both of those. When I came in the workshop, that was the moment I said to myself that I have to come here and study.

Nikolaos Aronis
BEng Mechanical Engineering

Choosing a Mechanical Engineering degree here is your first step into a sector that's rewarding and stimulating.

You'll study with expert professional and practising engineers whose research feeds into our course content. And we keep up to date with emerging technologies to train you in the most advanced ideas and techniques.

You could take part in a range of extra-curricular opportunities, including the chance to become part of our Formula Student team to build a single-seater race car in Europe's most established educational motorsport contest (read more over the page).

Facilities

Our excellent facilities include a robotics lab - complete with humanoid Baxter robots - and the FabLab. It's a purpose-built maker space with 3D printers, laser scanners and CNC, where you can digitally manufacture models and prototypes. You'll also have access to a Mechanical Engineering workshop and industry-level software such as MatLab, Solidworks and ANSYS.

92%

of engineering students in work or further study 15 months after graduating.¹

What we offer

Course	Typical offer	Example A levels	UCAS code		
BEng Mechanical Engineering	120	BBB	H300	H302 [§]	H303
MEng Mechanical Engineering	128	ABB	H301		H305
BEng Mechanical and Medical Engineering	120	BBB	HB38	HB37 [§]	HB36
MEng Mechanical and Medical Engineering	128	ABB	HBH8		HBH7

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications. You also need A level Maths at grade B or above or equivalent.

Where could this take you?

The skills you learn from studying engineering will give you access to career paths across a range of industries - including manufacturing, power, construction and the medical sector. And because there is a national shortage of engineers, your skills are likely to be in high demand with employers.

Our graduates have gone on to find work as science, engineering or technology professionals with organisations such as BAE Systems, British Energy, the Royal Navy, Williams F1 and Rolls-Royce.

Graduate careers

- Design
- Product development
- Production and engineering management
- Research

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

Accreditations

Our courses are accredited by the Institution of Mechanical Engineers and the Institution of Engineering and Technology and our Mechanical and Medical Engineering courses are also accredited by the Institute of Physics and Engineering in Medicine (IPEM). So they're major steps to Chartered Engineer status. BEng degrees fully meet the academic requirements to become an Incorporated Engineer and partly for registration as a Chartered Engineer. MEng courses fully meet the requirements for Chartered Engineer registration.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugmech

Spotlight on...

Formula Student

Racing start

Formula Student is Europe's most established educational engineering competition. Backed by big industry players, it challenges teams from universities across the continent to design and manufacture a single-seat racing car. The contest culminates at the world-famous Silverstone Circuit, where the cars face off in a series of static and dynamic events attended by some of the biggest names in motorsport.

We couldn't *not* get involved, could we? The Hull University Formula Student (HUFS) team was founded in 2010. Every year since, we've assembled a group of young innovators with a skill-set blending engineering know-how and business acumen.

So whether you love motorsport or you're just passionate about engineering, it's a fantastic opportunity to be part of a team and have fun developing your ideas.

You can prove - and improve - your ability to deliver a complex and integrated product. There's the buzz of designing a high-performance vehicle from scratch. And the extra skills you'll learn in business, marketing and more will supercharge your CV - putting you in pole position for the jobs race.

“ I repeatedly see the positive impact of the project reflected in our alumni, who I have the great pleasure of witnessing go on to highly respectable careers, armed with the additional experience gained from such invaluable projects as Formula Student.

Brian Houston
Lecturer in Mechanical Engineering
Hull Formula Student Co-Founder

“ The best experience was my first time seeing the car drive around the Silverstone Circuit. It's exhilarating seeing the car you worked on race at the iconic circuit.

John Beany
MEng Mechanical Engineering
Chief Engineer (2018-19)

Mechatronics and Robotics

Robotics and AI are the future, and at Hull, we'll teach you the skills to help determine that future. You'll learn how to create intelligent systems that are increasingly essential to a range of industries, placing great importance on the design, implementation and evaluation of automation and robotic systems, emphasising problem-based learning and 'learning by doing'.

“ Robotics is a varied subject, so you learn a wide range of skills – everything from computer science to maths to electronics to mechanics. Even things like moral principles – because when you're programming a robot it's got to make decisions based on the morality of human beings.

Hull has a great atmosphere, and there are lots of societies you can join. There's just a general good feeling all round.

Martin Davies
BEng Mechatronics and Robotics

One way or another, robots and AI are transforming how we live and work. Automated warehouses like Amazon's are changing the way businesses now operate. Drones deliver medicines to remote regions of the world. Robots are being used instead of humans in hazardous or inaccessible areas.

Our high-tech degrees blend electronics, electrical engineering, mechanical engineering and computing – applying them to the design and manufacture of intelligent systems.

Our teaching is linked to our research in simulation, visualisation, dependable systems, robotics, 3D printing, and mobile and distributed computing. That means you'll get expert teaching in the most advanced ideas.

92%
of engineering students in work or further study 15 months after graduating.¹

¹UK domicile full-time first degree leavers, Graduate Outcomes survey for the academic year 2017/18, published by HESA 2020.

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications. You also need A level Maths at grade C or above or equivalent.

≡ Where could this take you?

You'll find mechatronics and robotics in almost every aspect of modern life, creating a wealth of career opportunities for graduates. You could help to develop the latest technology – from driverless cars to drones; from space vehicles to automated production lines and technology-assisted clothing. Graduates are well-placed for leadership roles because they have the skills to integrate several areas of engineering and computer science.

🎓 Graduate roles

- Design engineer
- Robotics engineer

- Systems engineer

🗣️ Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers. We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

🏢 Facilities

You can get hands-on in our robotics lab, with humanoid Baxter, Pepper and Nao robots. Facilities also include the FabLab, where you can digitally fabricate models and prototypes with our variety of 3D printers, laser scanners and cutters, and CNC. Meanwhile the Hull Immersive Visualisation Environment (HIVE) offers advanced visualisation, motion capture and computer graphics technology. We also have a range of wheeled and flying robots for teaching and research use, from swarms of tiny traffic-simulation vehicles to drones capable of carrying kilograms of sensors and cameras.

🌐 IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugmechrobot

Medical and Biomedical Engineering

Medical engineering applies engineering principles to problems in healthcare. It's one of the fastest-growing and most dynamic sectors of the economy. At Hull, you'll also be able to spend time in local hospitals getting first-hand experience of medical engineering in practice.

“I've always wanted to do something 'hands-on', so the course was perfect - there are labs, workshops and hospital visits, whereas other universities are theory-based.

The highlight has been the hospital placements in the second year, which were really interesting and helped apply our knowledge.

Heather Charlesworth
MEng Mechanical and Medical Engineering

Skills enhancer

Through our links with medical device companies and NHS colleagues, we ensure that our courses are relevant and responsive to current demands and future trends in medical technology.

Our Mechanical and Medical Engineering degree focuses on the detailed design, analysis and manufacture of medical devices - such as prosthetics or orthopaedic and cardiovascular devices. Our Biomedical Engineering degree deals with the development of medical devices - in particular, those related to tissue engineering and regenerative medicine which can be used to replace or regenerate cells, tissues and organs.

You'll get tuition in the latest ideas, using advanced computer-based methods and experimental techniques. You'll get hands-on experience of medical technology (e.g. endoscopy, ultrasound), testing medical devices (prosthetics and orthotics) and biomaterials, and taking physiological measurements (EMG, ECG).

Facilities

There's significant ongoing investment in engineering, resulting in new specialist medical engineering teaching and research labs. You'll also get access to our FabLab - with the latest 3D printers, laser scanners and cutters, and CNC machines - where you can digitally fabricate models and prototypes, plus the Health and Human Performance Lab in our sports science facility.

Accreditations

All of our medical and biomedical engineering degrees are accredited by the Institution of Mechanical Engineers (IMechE), the Institution of Engineering and Technology (IET) and the Institute of Physics and Engineering in Medicine (IPEM). Our courses are a recognised qualification towards Chartered Engineer status.

What we offer

Course	Typical offer	Example A levels	UCAS code		
BEng Biomedical Engineering	120	BBB	H160	H166 [§]	H161
MEng Biomedical Engineering	128	ABB	H163		H164
BEng Mechanical and Medical Engineering	120	BBB	HB38	HB37 [§]	HB36
MEng Mechanical and Medical Engineering	128	ABB	HBH8		HBH7

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications. You also need A level Maths at grade B or above (or equivalent).

Where could this take you?

Medical engineers often work in hospitals, research facilities and regulatory agencies. Major medical device companies such as Smith & Nephew (who have their headquarters right here in Hull) and Johnson & Johnson employ graduates to design and deliver projects. Many of our students receive offers of employment before they graduate.

Graduate careers

- Medical device design and manufacturing
- Biomedical research and development
- Rehabilitation engineering
- Clinical engineering

Medicine

Your journey to becoming an outstanding doctor starts here. This thriving partnership between the Universities of Hull and York prepares you for life as a junior doctor through a combination of patient-centred teaching, problem-based learning (PBL) led by clinicians, and regular clinical experience.

“The breadth of clinical experience you gain at Hull York Medical School exposes you to patients from a wide range of backgrounds, while the early and sustained clinical placements help you to develop your communication and practical skills from the very start of the course.

Kiranjit Kaur
FY2 Junior Doctor, Class of 2019

We offer two undergraduate programmes. Our five-year Medicine degree combines patient-centred teaching, clinician-led PBL, rigorous academic study and regular clinical experience from week three of your first year. Our six-year Medicine with a Gateway Year degree, which is a Widening Participation initiative, includes an additional year at the start, which focuses on facilitating your transition from school or college to university. It brings your scientific knowledge up to the required standard, and enhances your study skills while teaching you about professionalism and the NHS. Both programmes result in an MB BS qualification, awarded jointly by the Universities of Hull and York.

From week three of the five-year programme, you'll experience weekly clinical placements in GP surgeries and hospital environments - and from your third year onwards, you'll be fully immersed in a range of clinical placements, rotating through different specialisms and locations.

This diverse and consistent real-world experience, guided by expert clinicians, means you'll begin to develop the excellent communication and clinical skills that you'll need to use on a daily basis as a qualified doctor.

Being a good doctor is about solving problems. That's why we put problem-based learning at the heart of our curriculum. Led by experienced tutors with a passion for education, it offers a lively and interactive way to build your knowledge, while reinforcing what you learn in your lectures and on clinical placement. PBL allows you to form strong relationships, learn how to communicate effectively in a group and work as part of a team to tackle and solve problems - skills that will be invaluable throughout your medical career.

➔ **Please turn over** to find out more about Hull York Medical School.

▶ What we offer

Course	Standard offer	UCAS code
Medicine (5 years)	AAA*	A100
Medicine with a Gateway Year (6 years)	BBC†	A101

You can order a copy of the Hull York Medical School prospectus, or view it online, by visiting hyms.ac.uk/prospectus

* Our standard offer is AAA at A level, including Biology and Chemistry. Resits are accepted if BBB is achieved in the first sitting. You must also have 6 GCSEs at level 9-4 / grade A*-C or equivalent, including English Language and Maths at Grade 6/B or above. You can find our full entry requirements, selection procedure and details of alternative and contextual offers at www.hyms.ac.uk/entry-requirements.

† Our standard offer is BBC at A level, with B in Biology and Chemistry. Maximum predicted grades: ABB. As a Widening Participation initiative, the programme prioritises applicants from the Hull York Medical School area. All applicants must fulfil additional contextual criteria, which can be found at www.hyms.ac.uk/gateway. You must also have 5 GCSEs at level 9-4 / grade A*-C or equivalent, including English Language and Maths.

For both programmes we require SJT Band 1,2 or 3.

If you have any queries about our selection procedure or admissions process, please contact our Admissions Team at admissions@hyms.ac.uk or on 01904 321690.

≡ Where could this take you?

At the end of both the five- and six-year courses, you'll receive your MB BS degree, which is a primary medical qualification (PMQ). Holding a PMQ entitles you to provisional registration with the General Medical Council.

Please visit hyms.ac.uk/medicine/after-you-graduate to find out more.

🔊 Skills enhancer

Being a successful doctor requires you to draw from a range of academic and life experiences. So we encourage you to pursue areas of specialised knowledge outside the core curriculum - tailoring the programme to suit your interests and career aspirations. From intercalation opportunities to the seven-week elective period in your final year, you'll have plenty of scope to develop your skills and try new experiences as you think about the kind of medicine you ultimately want to specialise in.

🌐 IELTS requirements

7.5 overall with no less than 7.0 in each skill. See page 190 for more details.

★ Extraordinary people

Dr Laura Cunliffe graduated from Hull York Medical School in 2017 and is now a junior doctor at Hull Royal Infirmary.

"Whilst undertaking my undergraduate training I experienced so many different clinical settings and scenarios, from acute psychiatry to hospices and brain surgery! This prepared me brilliantly for working life."

Spotlight on...

Hull York Medical School

A different kind of medical school

When you choose Hull York Medical School, you're choosing a different kind of medicine degree. One that prepares you for life as a junior doctor.

A partnership between the Universities of Hull and York, Hull York Medical School gives you access to the best facilities, support networks, research opportunities and academic expertise that the two universities have to offer.

We believe that strong communication and problem-solving skills are essential to patient-centred care, effective interaction with colleagues and ultimately being a good doctor. That's why we make sure that developing those abilities stays right at the heart of our curriculum.

Here, expert clinicians facilitate problem-based learning and your clinical skills training. So you'll get the support and shared real-world experience of seasoned healthcare professionals. Our commitment to small-group teaching extends to clinical placements, where

you'll learn from highly qualified clinicians (including consultants and senior specialists) in a stimulating, supportive environment.

We're proud of our partnerships with local NHS Trusts and community organisations. They enable us to stay in tune with workforce needs - and to provide you with a wide breadth of clinical placements, right from the very start of your degree. Our placement locations range from busy urban GP practices and major trauma centres serving densely populated areas, to mental healthcare providers, and rural and coastal community services. This gives you insight into differing patient demographics and experiences - plus exposure to the diverse career paths available to practising doctors.

Clinical placements begin in

week 3

“ Studying at Hull York Medical School has given me the opportunity to network with and be taught by highly respected senior doctors across a range of specialisms. I plan to specialise in surgery, so being able to experience time in theatre with accomplished surgeons has been one of the highlights of my time here.

Yangmyung Ma
Year 5

Modern Languages and Cultures

At Hull, you don't just become fluent in other languages. You'll embrace aspects of the cultures of the people who speak them.

“ The Chinese department at the University of Hull has greatly contributed to enriching my Chinese knowledge - from cultural social aspects to economic or even political ones, offering a wide variety of resources and always stimulating the curiosity of students.

Living with Chinese people on my year abroad in China was probably one of the most challenging and enlightening experiences I have ever had. That has immensely contributed to my understanding of the Chinese culture, history and today's society.

Arianna Radu,
BA Chinese Studies

Applied Modern Languages

This full-time degree programme (with its 3- or 4-year variants) provides intensive training in two modern foreign languages alongside the development of professional and employability skills for the world of work and intercultural awareness. On top of your language modules, our Professional pathway courses provide the opportunity to develop precisely these skills against the broader context of specific career trajectories that are available to modern linguists today. Our programme equips students to thrive in a variety of linguistic and vocational environments, in both local and global contexts.

Chinese Studies

Mandarin Chinese is by far the most commonly spoken language on Earth. Give yourself a boost in the global employment market by exploring the influential language and culture of this powerful nation. The knowledge you'll gain will only increase in value as China continues on its path to becoming the largest economy in the world. You'll be able to delve into aspects including history, culture, how we construct national and cultural identities, language teaching and translation skills.

95%

of students in work or further study 15 months after graduating.¹

What we offer

Course	Typical offer	Example A levels	UCAS code		
BA Applied Modern Languages	112	BBC	Q140 [†]		Q141 [†]
BA Chinese Studies	112	BBC	T100	T101 [§]	

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

[†] You also need an A level in a Modern Foreign Language at grade C or above or equivalent.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

Where could this take you?

Our objective is to not only make you fluent in one or more languages, but also to foster the critical and analytical skills - and the confidence and maturity - which will make you attractive to employers. Modern languages are vital in a world of international cooperation, interdependence and trade.

Our graduates are equipped for a range of careers including translation and interpreting, journalism and teaching. Many have also gone into roles within business, broadcasting, law, politics, charities, public relations and education, as well as the Civil Service. You can also choose the pathway to further study and training: some of our graduates have gone on to Masters courses; others have taken a teaching route and progressed to a Postgraduate Certificate in Education.

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers. We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

World explorer

As part of Chinese Studies, you can choose to gain an extra qualification in Teaching English to Speakers of Other Languages (TESOL). That opens the door for worldwide travelling and working after graduation.

Your time abroad

Depending on your degree programme you'll spend at least one trimester in one of the countries of the languages you're studying. Students of Chinese Studies will spend an entire year in China, experiencing its people, language and culture first-hand.

We'll support you throughout your stay, through a dedicated tutor who'll stay in contact over the whole year. You can study at one of our partner universities, go on a work placement or teach at a range of institutions.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

Music

Musicians in the 21st century must be creative, knowledgeable, adaptable and entrepreneurial. At Hull, you'll develop the skills and knowledge to become the musician you want to be, surrounded by a creative and innovative community and support network, while benefiting from our industry-standard facilities.

“ When I first came to uni, as far as I was concerned I was just a guy who liked playing the blues. Whereas now, I've really sharpened my tools - I just finished an album this year! I'm over the moon and I know I couldn't have done that three years ago.

Connor J Phelan
Music Graduate 2019

Experience amplifier

Our partnerships with the Royal Philharmonic Orchestra (RPO) and Opera North are brilliant news for our music students. RPO musicians will hold masterclasses and offer career advice plus ensemble coaching, one-to-one tuition and opportunities to get experience at rehearsals and concerts. There'll also be chances for work placements on live events and projects in and around Hull.

With a superb array of musical instruments and recording equipment at your disposal, you'll have the opportunity to develop specialist skills in different areas of music, choosing from performance, songwriting, popular music, or community and education on our BA Music degree. You'll also put these skills into historical and cultural contexts, as you grow into a well-rounded future professional.

You'll work on major creative projects, both individually and collaboratively, and undertake placements based around your passions and career aspirations. Your course will also incorporate a range of performance opportunities, building to a public facing showcase.

There's a strong emphasis on hands-on learning - putting ideas into practice, backed up by the theory. You'll be able to unleash your creativity in our industry-standard music production facilities, with our Music Production students in particular getting a taste of real-world conditions.

You'll gain essential skills for the music industry, with assessments focused on practical outcomes. And the music-focused pathways on our BA Creative Industries degree will give you a grounding in wider leadership and creative arts management.

From DJs to band members, trumpet virtuosos to session musicians, our performance-led staff are active in making music themselves. They'll deliver a unique perspective on current trends in musical thinking, with high levels of contact time. And events like BBC Radio Humberside Introducing showcase students or recent graduates live from the campus on the BBC.

Philosophy

At Hull, you get to question everything. We encourage you to query fundamental ideas, using reason, logic and imagination. We make classic texts come alive and reveal the relevance of philosophical thinking, questioning and problem-solving – helping you build skills for a range of careers.

“ The Philosophy lecturers here are really knowledgeable and friendly. The course covers a wide variety of topics, from the typical ones usually taught at degree level to more specialised topics, such as Confucian philosophy and the philosophy of photography. It encourages you to challenge your assumptions and gives you the skills needed to argue for new points of view.

Ben John Campion
BA Philosophy

Philosophy has been taught at the University of Hull since we first opened in 1927. We're consistently rated highly for student satisfaction, thanks to the expertise of our staff and their focus on developing each individual student. Our approach has always been simple – you learn philosophy by *doing* philosophy: we teach you to experience the intellectual excitement of engaging in philosophical debate.

We're looking for people who enjoy digging underneath the surface of an issue, challenging assumptions and examining philosophical principles. This is a course where your voice matters. We ask you to think for yourself, to be willing to change your mind and to seek to change the minds of others.

As well as traditional issues such as ethics, consciousness, free will, reality, truth and justice, our degrees also explore emerging issues like artificial intelligence, gender, political power, image technology, science and the environment.

100%

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Points can be from any qualification on the UCAS tariff, but must include at least 80 points from two or more A levels, or a combination of appropriate Level 3 qualifications.

≡ Where could this take you?

The way we teach Philosophy at Hull will sharpen your analytical and critical skills, and encourages intellectual integrity and a creative approach to problem-solving – all attributes that employers look for.

In Peer-Assisted Study Sessions (PASS), our students hand down their enthusiasm and wisdom from one year group to the next. PASS trains volunteers to lead small-group discussions which boost skills and knowledge. This way you can gain experience in mentoring and leadership while enriching your studies.

Physics and Astrophysics

Physics. It's how the world works: from the nanoscale to the cosmological. Here, you can help us chip away at the boundaries of knowledge. Our students conduct real investigative research in areas like advanced materials, lasers and space science – tackling questions that no-one else has yet answered.

“As soon as I looked around the University, I knew it was the place for me. Everybody was so welcoming and friendly. The staff are really supportive here – they're always willing to help, and everybody works so well together. It's a great community to be in. We got to go to CERN to look around... it was just a fantastic experience.

Leah Cox
BSc Physics

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

Advances in new energy sources, modern medical techniques, communications and computers ... they've all come from physicists with the knowledge to innovate and the skills to deliver. A physics degree at Hull provides you with a thorough grasp of fundamental Physics and maths concepts. It also gives you the investigative skills to apply these concepts to new areas of science, technology and enterprise.

You'll study under respected authorities in research areas such as condensed matter theory, cosmology, and astrophysics. But our staff's immense knowledge isn't all they bring to the table: they're also excellent nurturers of talent.

In your first two years, you'll have weekly tutorials (in groups of no more than seven or eight students in your first year), and throughout your degree there are one-to-one feedback sessions with your tutor. We'll help you develop the transferable data science skills (for example in Python, one of the fastest-growing programming languages) that employers value.

We're also part of WRIPA (White Rose Industrial Physics Alliance), a unique employability network which runs careers fairs and events where you can meet potential future employers.

★ Extraordinary people

Professor Brad Gibson
Head of Physics and Director of the E A Milne Centre for Astrophysics

Professor Gibson is a world-renowned expert at using supercomputers to model the distribution of chemical elements throughout the Universe. With the Hubble Space Telescope, he determined the expansion rate of the Universe – an achievement which won his team the Gruber Prize in Cosmology and made *National Geographic's* 'top 10 news stories of the year'.

≡ Where could this take you?

Recent Hull graduates have gained professional roles at companies such as Rolls-Royce, Thales, QinetiQ, NPL, RB (formerly Reckitt Benckiser), Atkins and Clyde Bergemann. Others have secured places on graduate training schemes with the National Grid and the NHS, among others.

🎓 Graduate careers

- Data scientist
- Laser systems engineering
- Telecommunications
- IT and computing
- Medical physics
- Nuclear engineer

🔊 Skills enhancer

At Hull you'll have access to Viper – one of the most powerful supercomputers in England. That gives you the opportunity to carry out truly cutting-edge research in different areas of physics.

🗨️ Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers.

We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

🏆 Accreditations

All our courses are accredited by the Institute of Physics. And our integrated Masters degree meets the educational requirements for qualification as a Chartered Physicist.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugphysics

Politics and International Studies

Politics at Hull takes you to the heart of contemporary political debate. It enables you to assess and challenge arguments over the key issues of the day, such as the possession and exercise of power; wealth and inequality; individual and collective identity; and the use of violence for political ends.

“ My one-year work placement has been the best opportunity of my life. I've learnt a lot about myself and other people and a lot about what I want to do in the future.

I've done all sorts - I draft parliamentary questions for submission to the ministers and other Government departments. I focus a lot on doing case work, which I've really enjoyed doing.

Lucy Dunwell
BA British Politics and Legislative Studies

These types of issues drive today's world. And by examining them you'll gain critical insights into the domestic and global significance of politics.

You'll research, you'll debate and you'll learn from some of the country's leading experts in British government and politics, political theory, political economy, international relations, and war studies.

You'll also gain the skills to research, source and examine information, to critically analyse evidence and construct robust arguments. You could spend a trimester studying abroad. And through our unique internship opportunities, you can get access to Parliament or an alternative politics-related learning placement, such as at the Hansard Society, the Humber Local Economic Partnership or the Royal Armouries Museum in Leeds, among others.

★ Extraordinary people

Professor Philip Norton
Lord Norton of Louth

Described as the UK's 'greatest living expert on Parliament' by the Political Studies Association, Lord Norton was appointed our Professor of Government in 1986, which made him Britain's youngest professor of politics at the time. He is the author or editor of 32 books and received a peerage in 1998.

Westminster internships

Party invitation

'The Hull Mafia'. That's what they call our graduates in Westminster, because there are so many of us walking the corridors of power. We're everywhere. Inside every major party. On the back benches and the front. In the Shadow Cabinet. On the Privy Council. Everywhere.

The quality and prestige of our politics degrees opens doors to careers in politics or the Civil Service. An integral part of this - and a big reason for the pipeline of talent leading from East Yorkshire to Westminster - is our amazing placement scheme.

For one trimester or a full 12 months, you could intern for an MP or a peer in Westminster. You'll gain an intimate understanding of parliamentary procedures and protocols. The scheme has been running for more than 30 years now, so it's garnered significant credibility in political circles. And our links with a large pool of MPs mean we'll probably be able to match you with a politician whose role reflects your area of political interest. We'll also make sure you're prepared ahead of your placement, ready for the experience to come.

You'll also go to our exclusive seminar series, with guest speakers including senior parliamentary officials like the Speaker, Black Rod, the Clerk of the House and the Serjeant-at-Arms. During your stay in Westminster, you'll be supported by Lord Norton, our Professor of Government - and our dedicated team here in Hull will stay in regular contact.

It's a once-in-a-lifetime opportunity to study the machinery of British politics while you watch its cogs actually turning. As the Hull Mafia might say, it's an offer you can't refuse.

“ The University has been there all through this process, dropping me emails, sometimes dropping in with a call to check how I am. These are all important things, especially when you're thrown into an institution like Parliament - having that support on hand is absolutely essential.

Jacqueline Gomes-Neves
BA British Politics and Legislative Studies

“ It's still surreal to me. I'm down here walking about in the corridors of power. I just really can't ask for a better course.

James Parker
BA British Politics and Legislative Studies

Annemarie Wattleby, Jacqueline Gomes-Neves and James Parker on placement at Westminster.

Psychology

Explore the science behind human behaviour, with the option to study at one of our selected European partner universities, in this British Psychological Society-accredited course.

“ I get the opportunity to take part in group experiments, which includes conducting experiments myself - but also taking part in the third years' experiments as a participant.

I've become a lot more confident and independent since coming to Hull, as I'm encouraged to do my own reading outside of lectures and take on tasks independently.

Lisa Stafford
BSc Psychology

Accreditations

The British Psychological Society accredits our BSc courses. So if you graduate with at least a 2:2, you can become one of their graduate members. That's an essential step towards qualifying as a Chartered Psychologist.

Our staff are experts in their fields, so you can be confident of a deep and insightful education in this fascinating subject. You'll study human behaviour including memory, social relationships, child development, the ageing brain and forensics, using our specialist scanning and testing facilities. And you'll develop practical and technical skills which can help tackle real-life issues such as dementia, under the guidance of professional psychologists.

Our main BSc Psychology degree programme is taken by the majority of our students. It is also possible, by choosing four specialist options in your final year and undertaking a relevant research project dissertation, to graduate with a specific named-pathway degree - currently we offer BSc Psychology (Neuroscience), BSc Psychology (Applied Psychology), and BSc Psychology (Clinical Psychology). All BSc Psychology and named pathway degrees are fully accredited by the British Psychological Society.

If you opt for our BSc Psychology with Criminology programme, you'll gain a thorough understanding of crime, the human mind and how the two overlap and interact. Learning from work placements and experience-enhancing visits thanks to our links with criminal justice agencies, you'll discover how crime begins in the mind.

You can spend a semester at one of our European partner universities (including universities in the Netherlands, Germany, Norway, Italy, Hungary and Malta).

What we offer

Course	Typical offer	Example A levels	UCAS code	
BSc Psychology	120 - 128	BBB - ABB	C800	C802 [§]
BSc Psychology with Criminology	120 - 128	BBB - ABB	C8M9	C8M8 [§]
BA Criminology with Psychology	120	BBB	M9C8	

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

Where could this take you?

Our degrees are professional qualifications which can pave the way for you to become whatever type of psychologist you want. And they can also open doors to other industries thanks to the transferable skills you'll learn. Our graduates have gone into areas as diverse as broadcasting, social work, teaching and management consultancy.

Graduate roles

- Clinical psychologist
- Educational psychologist
- Sports psychologist
- Forensic psychologist
- Occupational psychologist
- Industrial psychologist

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers. We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

Why is there a range of points for the course I'm interested in?

If you apply for one of these programmes, you'll receive an offer that aligns to your predicted points.

➔ **Please turn over** to find out more about Clinical Psychology doctorates.

Prospects promoter

Our BSc Psychology degree puts you on the fast track to qualifying as a clinical psychologist, thanks to its link - unique in the UK - with our Doctorate in Clinical Psychology (see over the page for more details). At Hull, you could also work as a research assistant while you study, gaining hands-on experience for your CV. You'll get the opportunity to help a member of staff with real-world research projects. It's a great way to sample life as a researcher and participate in day-to-day lab activities.

Facilities

Our resources include an electroencephalography (EEG) machine for measuring brain activity, a brain stimulation lab with equipment to treat patients with brain injuries or psychiatric conditions; an eye-tracking laboratory to study areas of cognitive psychology such as attention and perception; a baby lab to discover how infants develop; and an audiometric laboratory for studying responses to sounds, including noise, speech and music.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugpsychology

Clinical Psychology doctorates

Meet the new doctor

This is Abigail. She's smart. We know this because a) she's about to get a doctorate in Clinical Psychology. And b) she chose to do it at Hull, meaning she'll qualify way more quickly than if she'd gone to any other uni.

Yes, you *did* read that right. On our BSc Psychology degree, if you complete the specialist clinical psychology modules in your third year, then you can apply for the fast-track route to our Clinical Psychology doctorate. It's 'fast-track' because - unlike other universities - you don't need to spend an extra two years gaining work experience after your degree before you start the doctorate programme. Together with our partners at the University of York, we're the only university that does this.

We should also point out that our doctoral degree is accredited by the British Psychological Society (meaning you'll be eligible for Chartered Membership when you graduate) and it's approved by the Health and Care Professions Council. So after graduation you can apply to register to practise as a Clinical Psychologist.

We should also mention that while you're studying for your doctorate, you'll get your tuition fees taken care of by the NHS - and they'll pay you a wage. So let's just recap. Employed by the NHS. Tuition fees paid for. Get a salary. Become a doctor. See? We told you Abigail was smart.

“ The moment I realised that I wanted to come to Hull was quite a pivotal one. I'd previously been adamant that I didn't want to go to university - hence only applying last minute - but when I looked at the course options and the academic support offered in the Psychology Department, I was sold. It's so well structured and tailored to promote thinking forward to what you may want to do after you graduate.

Abigail Daniels
Psychology ClinPsyD

Social Work

If you're interested in a career that will make a real difference in people's lives, BA Social Work could be for you. Our range of placement opportunities and expert staff will prepare you for a career as an outstanding social work practitioner.

“ For me, social work is about empowering people to realise that they can change: that they have strengths inherent within themselves and that with a bit of support they can change in a really positive way.

Chris Brown
MA Social Work

Taught by experts with real-world experience, you'll study issues like homelessness, drug and alcohol use, disability and mental health as well as social welfare policies and the safeguarding of adults and children. Fundamentally, you'll develop the skills to work with adults, children and young people in a range of circumstances and learn how to safeguard and protect people where required.

We're one of the founding members of the Humber Social Work Teaching Partnership, giving you access to some of the biggest employers of social work practitioners in the area. And thanks to those strong relationships, you'll get a range of placement experiences from inner city to market towns and seaside resorts. This provides you with a breadth of experience that makes you highly employable after graduation.

This programme is accredited by Social Work England which means you can apply to register as a qualified social worker on graduation. As our programmes are accredited, you could be eligible to receive support from the NHS Social Work Bursary Scheme. These bursaries can help significantly with study and living costs so make sure you take advantage once you've confirmed your place.

▶ What we offer

Course	Typical offer	Example A levels	UCAS code
BA Social Work	120	BBB	L500

Your points should be from three A levels, or appropriate Level 3 qualifications.
All applicants must have GCSE Maths and English Language Grade 4 or C, or equivalent.

📍 Where could this take you?

Practice placements give you real-world know-how to back up the theory. On our degrees, you'll clock up hundreds of hours in a professional setting: front-line experience that can put you at the front of the jobs queue.

🎓 Graduate roles

- Social worker
- Mental health practitioner
- Drug practitioner
- Community worker
- Welfare rights advisor
- Youth justice officer
- Housing officer

💬 Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers. We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

🏆 Accreditations

Our Social Work degree is validated by Social Work England. If you graduate from this course, you can apply to register as a qualified social worker.

📣 Prospects promoter

If you don't meet the entry requirements for our full degrees, there's still a way in. You can study part time for a year on the University Certificate in Health and Social Care Practice course. Passing that means you can apply for our BA Social Work degree. We also have an evening and online option: the Alternative Route into Health and Social Care. It's a flexible course designed for people who need to fit their studies around other commitments like work and childcare.

🌐 IELTS requirements

BA Social Work requires 7.0 with no less than 7.0 in each skill. See page 190 for more details.

91%
of students in work or further study 15 months after graduating.¹

¹ UK domicile full-time first degree leavers, Graduate Outcomes survey for the academic year 2017/18, published by HESA 2020.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugsocial

Sport, Health and Exercise Science

You'll combine theory with hands-on experience to build a rewarding career in sport and health fields at Team GB's only Official University Partner.

“ When I visited Hull on an Open Day everyone was so welcoming and cheerful. I thought the campus was stunning - I love the mix of old and new buildings.

The Biomechanics Lab really stood out to me, as not all universities that I visited had a facility or equipment like Hull's. The department has amazing links for students attending placements, including Hull City FC, Hull KR and local private clinics that are highly respected.

Lucy Satur,
BSc Sport Rehabilitation

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

All our sports courses have placements embedded to get you work-ready, thanks to our connections with professional sports teams, elite athletes and local health providers. This means you'll learn to apply the theory through hands-on experience and help others achieve their potential.

You'll discover the principles and theory that underpin sports health and exercise science from tutors who work with both elite-level sports performers and NHS patients, and who've collaborated with FIFA, the International Olympic Committee and the World Anti-Doping Agency.

At Hull, you'll learn and conduct research using some of the latest, most innovative technology in the sector. You'll work in facilities such as our Health and Human Performance Lab, Sports Rehabilitation Suite, Environmental Chamber, Performance Analysis Suite and Exercise Physiology Labs.

You'll be at a university that invests in our students' sporting potential. Each year we award scholarships on our Talented Athlete Programme. As well as a cash award, you get tailored support to suit you and your sport. And you'll benefit from our recent £16-million investment in sports facilities as well as the opportunity to join one of our 50 Athletic Union clubs run by the union (see page 168).

On top of all that, of course, you'll be studying sport, health and exercise science at the only university that's the exclusive Official University Partner of Team GB.

98%
of students in work or further study 15 months after graduating.¹

¹ UK domicile full-time first degree leavers. Graduate Outcomes survey for the academic year 2017/18, published by HESA 2020.

▶ What we offer

Course	Typical offer	Example A levels	UCAS code	
BSc Physiotherapy [†]	128	ABB	B160	
BSc Sport and Exercise Nutrition	112	BBC	C613	C614 [§]
BSc Sport and Exercise Science	112	BBC	C610	C611 [§]
BSc Sport Rehabilitation	112	BBC	C602	C605 [§]
BSc Sports Coaching and Performance Science	112	BBC	CB69	CB68 [§]

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

[†] You also need A level at grade B or above (or equivalent) in Biology, Human Biology, or Physical Education. For A level Biology, this must include a Pass in the practical element for reformed A levels completed in 2017 or later. Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

≡ Where could this take you?

On these degrees, you'll gain theoretical knowledge and real-world skills that are relevant to this growing market. So when you graduate, you'll be ready to work in specialist areas like professional sport, personal training and a range of NHS roles including health trainer or entering the NHS Scientist Training Programme. Recent graduates have gone on to secure roles with respected professional football clubs including Middlesbrough and Hull City.

🎓 Graduate roles

- Sport rehabilitator
- Clinical exercise scientist
- Sport scientist
- Personal trainer
- Sport nutritionist
- Performance analyst
- Coaching
- PE teacher

£ Extra funding

From August 2020, undergraduate students studying physiotherapy will receive a payment of at least £5,000 a year. You don't need to pay this back, and you'll get it as well as your student loan.

🗨 Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers.

We can also get you into the room with employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

🏆 Accreditations

Our Sport Rehabilitation degrees have accreditation from the British Association of Sport Rehabilitators and Trainers (BASRaT). Our Sport and Exercise Nutrition degree is endorsed by the Sport and Exercise Nutrition Register (SENR).

A graduate success story

The equaliser

With almost three million active players, football is the country's leading female team sport. But gender stereotypes which insist "football's not for girls" just won't take the hint - stifling encouragement to play and blocking routes to getting involved. By the time they're 10, 95% of boys are playing some form of football. Girls the same age? Only 41%.¹

But people like Hull graduate Amber Amey are gradually levelling the playing field. She was named a 'Higher Education Hero' by British Universities and Colleges Sport for her contribution to getting women and girls involved in football.

Amber's been working with our Sport Development Team to increase female participation in football across age groups. She's also led a community programme to support the girls' game in schools. That's created a pathway to the SSE Wildcats sessions in Hull - regular opportunities for girls to play after school and at weekends.

When she started her course, Amber had no specific career plan. Now, armed with a first-class degree in Sport Rehabilitation, she's already worked with Doncaster Rovers and Hull FC. She's been on tour with academy rugby league scholars and enjoyed a three-week stint coaching football to kids in Ghana.

“ Studying at Hull has provided me with opportunities to work with so many different people and organisations. It's easy to come through university just doing what's necessary, but by seeking new experiences I've been given amazing opportunities.

Amber Amey
BSc (Hons) Sport Rehabilitation
Graduate

¹Source: *The Independent*, 24 March 2017, 'Women's Football Has Brighter Future but Playground Stereotypes Still Need to be Tackled'.

Teacher Education

This is your chance to make a real difference to the next generation of thinkers, makers and dreamers. Here you'll be shaping the lives of children and young people, picking up theory from experienced education practitioners. And, crucially, you'll be putting it into practice.

“ Hull was just natural for me after looking at other universities. It was so accepting and felt like home before I even became a student here. Becoming a teacher for primary school children is all I've ever wanted to do and become. Hull University and my course have allowed me to go for my dream job!

Heather Walton
BA Primary Teaching

Our courses give you the opportunity to specialise in a particular area or age range, using advanced methods taught by expert staff whose research spans a variety of areas. With us you'll get individual tutor support, a school-based mentor for your placements, a University mentor and a pedagogical specialist.

And we're not just about training you for three or four years: we invest in you over the course of your career. So even after graduation, you'll be able to access professional development opportunities such as our annual NQT (newly qualified teacher) conference and our specialist Masters-level programmes.

See pages 58-59 for details of our courses in Education and Childhood Studies.

▶ What we offer

Course	Typical offer	Example A levels	UCAS code	
BA Primary Teaching	112	BBC	X120	X187 [§]
BA Learning and Teaching (Primary Education) (Top Up)	¥	n/a	n/a	

Your points can be from any qualification on the UCAS tariff, but at least 80 points should be from two or more A levels, or a combination of appropriate Level 3 qualifications.

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

[¥] Applications are made directly to the University. Please email admissions@hull.ac.uk for details.

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers. We can also get you into the room with a range of employers at on-campus events. Networking helps you plan your career path and can open doors to internships and job offers.

Qualified Teacher Status

Following the successful completion of your course, either through the Primary Teaching degree or top-up route, you'll be recommended for the award of Qualified Teacher Status.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

Experience amplifier

We have links to Primary Schools across North Lincolnshire, Humberside, the East Riding, and North Yorkshire. This means our courses come with fantastic opportunities for a range of placement experiences that allow you to develop into the best teacher you can be.

94%
of students in work or further study 15 months after graduating.¹

Zoology

Explore the amazing diversity of animal life on this flexible degree which combines traditional zoology with contemporary biology. It's a course designed for 21st-century scientists, opening pathways to rewarding careers that make a real difference.

“ There are lots of amazing opportunities to apply your learning in real situations and lots of outdoor learning experiences. The University also has some great partnerships with organisations like The Deep and the Yorkshire Wildlife Trust, and you get so much support from your lecturers. They're always available to help and they push you to achieve so much more.

I've done so many different things and these experiences have really transformed me and my outlook on the future.

Ellie Bartle
BSc Zoology Graduate 2019

Zoology is all about animals, whether you just want to understand them better or work to protect the amazing biodiversity of this planet. You will study core subjects including cell biology, evolution, marine biology, biological diversity, invertebrate and vertebrate zoology, ecology, and animal behaviour and can choose from options in genetics and genomics, geographical and environmental sciences, conservation, marine sciences and management, and Environmental Impact Assessment. This allows you to build a course to suit your interests and ambitions.

Excellent teaching is highly valued here. Hull is the only university in the world to have two winners and one finalist in the Royal Society of Biology's Higher Education Bioscience Teacher of the Year Award. We incorporate our diverse and globally-impactful research into our teaching, which makes for a wide choice of final-year projects, with particular specialisms in the evolution of behaviour and the monitoring, management, and conservation of wildlife.

You'll learn in a friendly, supportive learning environment, where our lecturers love what they do. You'll be allocated an academic tutor who'll support your progress towards your aspirations. Our course focuses on a unique blend of laboratory and field-based practical teaching, as we recognise the need to work across disciplinary boundaries to solve global issues.

Skills enhancer

Our degrees are built around skills requested by bioscience employers, including genomic technologies, field survey techniques, GIS, and science communication skills. You can also learn to dive during your degree. Choose our subsidised Dive Training option within the Ecology module and become a PADI-certified Advanced Open Water Diver (extra fee may be payable). See page 90 to find out more.

What we offer

Course	Typical offer	Example A levels	UCAS code	
BSc Zoology	120	BBB	C300 [†]	C301 [§]

[§] A Foundation Year offers an alternative entry route onto our degree programmes and entry requirements are different; a typical offer is 80 UCAS points but we do review each application on a case-by-case basis. See page 20 or contact our Admissions service for further details.

[†] You also need A level Biology or Applied Science at grade C or above (or equivalent), including a Pass in the practical element in Biology for reformed A levels completed in 2017 or later.

Where could this take you?

Graduates from this course go on to work in a range of careers with employers such as the Environment Agency, Natural England, wildlife trusts and conservation agencies. Students also go into postgraduate study across the world, including enrolling on our own taught Environmental Change Monitoring and Management degree, research Masters programmes, or PhDs.

Graduate roles

- Zoologist
- Conservation advisor
- Wildlife management
- Ecological consultant
- Animal husbandry and welfare
- Research scientist

Career advice and support

Our team give you expert career advice and training. We'll help you explore your options and progress into a career you'll love. You'll learn how to apply for jobs, prep for interviews and impress potential employers.

We can also get you into the room with employers at on-campus events. Networking helps you plan your career and can open doors to internships and job offers.

IELTS requirements

6.0 overall with no less than 5.5 in each skill. See page 190 for more details.

★ Extraordinary people

Dr Dominic Henri, Lecturer in Zoology is passionate about improving the way that biological sciences are taught. He was the Royal Society of Biology's Higher Education Teacher of the Year in 2018, a national finalist in FameLab 2019 for bioscience communication and has received a Teaching Excellence award for his teaching at Hull.

96%
of students in work or further study 15 months after graduating.¹

¹ UK domicile full-time first degree leavers, Graduate Outcomes survey for the academic year 2017/18, published by HESA 2020.

World explorer

On this degree, you'll benefit from exceptional field work opportunities – allowing you to explore exciting locations and develop your field-based skills. Recent overseas trips have included environmental studies along the shores and mountains of Mallorca, diving on the coral reefs of Malaysia and exploring the rainforest biodiversity of Brazil.

For more info about entry requirements and the modules you could choose, visit www.hull.ac.uk/ugbio

How to apply to Hull

When you apply to Hull, you'll have a team ready to answer your questions every step of the way. From starting your application to the day you secure a place to come here.

UCAS

For most of our full-time undergraduate courses, you apply through the Universities and Colleges Admissions Service (UCAS).

To register and apply, go to ucas.com/students.

Our UCAS institution codes:

H72: All Hull courses except Medicine

H75: Medicine (Hull York Medical School)

When's the deadline for applications?

UCAS applications for 2022 open in May 2021 and can be submitted from September 2021.

For Medicine, your application must reach UCAS by 15 October of the year before the course starts. You can find out more about Hull York Medical School at hyms.ac.uk.

For all other programmes, you should apply by 15 January 2022 to guarantee your application is given equal consideration.

To guarantee entry to the University, you must meet all the conditions of your offer by 31 August 2022.

When can I use UCAS Extra?

If you've used all five of your UCAS choices but not had any offers, UCAS Extra lets you make one more choice. It's available from late February until early July.

Please check the UCAS website for up-to-date information, including which courses are available.

What are UCAS points?

Because most people apply through UCAS, we put our entry requirements in terms of UCAS tariff points - commonly earned through A levels, BTECs, Cache Diplomas or OCR Technicals (see the fold-out bookmark on the back cover for more details).

You can work out how much your qualifications are worth in UCAS points at ucas.com/tariff-calculator.

How many UCAS points do I need?

That depends on the course you want to study. You'll find entry requirements on the course pages in this prospectus or at hull.ac.uk.

As a guide, we consider applications with predicted grades totalling 112 UCAS points or above. If you have 80 tariff points or more (but less than 112), you might want to think about a foundation year programme - see page 20.

Some courses have particular requirements like a higher entry tariff or specific conditions to meet the standards set by professional bodies.

Sometimes we'll specify an essential subject that has to count towards your tariff total. And, for more unusual qualifications, we sometimes put our offer in terms of grades.

Do I need to give references?

Yes, you do. We need you to give a satisfactory reference with your UCAS application. If you're applying for one of our nursing, midwifery, operating department practice or paramedic science courses, we'll ask you for an extra reference later on.

📅 Dates for your diary

- ▶ **1 September:** UCAS applications open
- ▶ **15 October:** Medicine UCAS applications deadline
- ▶ **15 January:** UCAS applications deadline for all other courses to guarantee equal consideration
- ▶ **Late February:** UCAS Extra opens
- ▶ **30 June:** Main UCAS application scheme closes
- ▶ **Early July:** UCAS Extra closes

Will I be asked for my medical history?

For some courses leading to professional training, you need to provide information about your medical history or meet vaccination requirements.

I've not been to college but I've got other qualifications. Can I still apply for Hull?

Yes. We welcome a range of qualifications from the UK, EU or further afield, including Level 3 work-based learning like Advanced Apprenticeships and NVQs. And if you need to top up your knowledge before starting your degree, you can apply to do a foundation year course (see page 20).

I'm a mature student. Can I apply to Hull?

Absolutely. You can apply in the same way through UCAS. And don't worry about qualifications - your original education plus your career experience might be enough.

❓ Don't see the answer you're looking for?

Please call us on 01482 466100 or email admissions@hull.ac.uk, and we'll be happy to help.

I'm an international student.

Can I apply to Hull?

Yes, of course! We've got students from more than 100 countries. We'll assess your fee status when you apply, and then we may ask you for more information.

To find out more about how to apply as an international student, please go to hull.ac.uk/international. And for independent advice, please see ukcisa.org.uk.

Is there an age limit for any courses?

If you're studying nursing, midwifery, operating department practice or paramedic science, you must be at least 18 when your course starts. For all other courses, there's no upper or lower age limit - but we may need special arrangements for anyone under 18 at the admission stage.

Can I apply after I get my exam results?

Yes, you can still apply to Hull through Clearing or Adjustment. We also use UCAS Extra, which is open until early July.

Can I delay starting my degree until next year?

Yes, we welcome applicants who want to secure their place now but delay starting their degree until 2023.

The subject I want to study says 'final validation pending'. What does that mean?

It means we intend to offer this course, but it hasn't got official final approval yet. Please call our Admissions Service on **01482 466100** to confirm whether the course will be running.

Why Hull makes financial sense

Going to any university is good sense because you're investing in your future. But it makes even more sense if you choose Hull, and here are five reasons why...

1 Your money goes further here

We're the UK's most affordable city¹ - fact. We've got the lowest rent in England, according to NatWest.² And one of the cheapest pints in the country, as revealed on International Beer Day 2019.³

2 Cheaper than Leeds, Lincoln, Manchester...

...York, Liverpool, Newcastle, Nottingham, Sheffield, Derby, Birmingham, Leicester, Southampton, Bristol, London and more, according to the latest figures from numbeo.com.

3 Thousands of jobs and paid placements

We have a well established internship programme here, including flexible options you can do alongside your studies. We advertise thousands of jobs every year, and can give you all the help you need to be successful in applications and interviews.

4 Be an influencer and earn while you learn

When you sign up to be an ambassador, you get to inspire future students, show off the campus and share your stories of Hull life. It's a way of earning while you study and looks good on your CV, too.

5 We'll do the maths for you

Not sure how much you'll get from your Tuition Fee Loan and Maintenance Loan? Our team can handle it for you right now.

Check out our easy-to-use guide over the page, call us on **01482 466538** or email **hefunding@hull.ac.uk**.

Your guide to fees and funding

So ... time to talk about money. How much does university cost? How are you going to pay for it?

How much does it cost to study an undergraduate degree?

You'll pay lower fees while you're on a year abroad or an industrial placement year.

What loans are available?

There are two types of loan available to students from England:

Maintenance Loan

- Helps with the cost of living
- Partially means tested
- Paid straight into your bank account at the start of each term
- You won't have to pay any of it back until you're earning more than £27,295 a year
- After 30 years, any remaining debt is written off - regardless of what you still owe

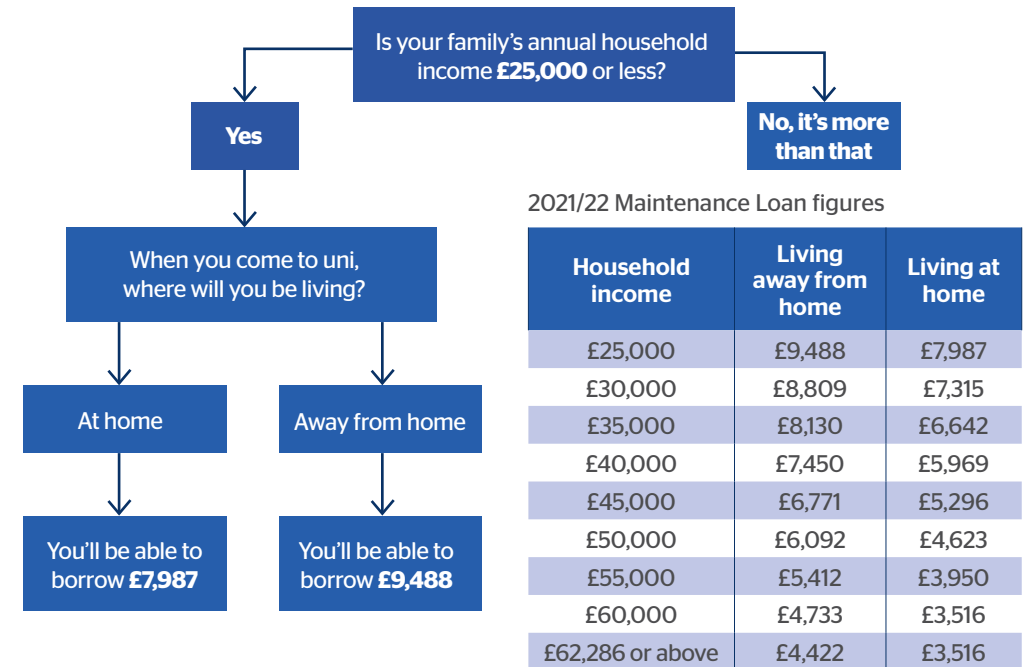

Tuition Fee Loan - Currently £9,250*

- Covers the full cost of your course fees
- Paid straight to the University
- You don't start paying any of it back until you're earning more than £27,295 a year
- After 30 years, any remaining debt is written off - regardless of what you still owe

* Subject to approval. This fee is subject to an increase in line with inflation. Maximum tuition fees are set by the government.

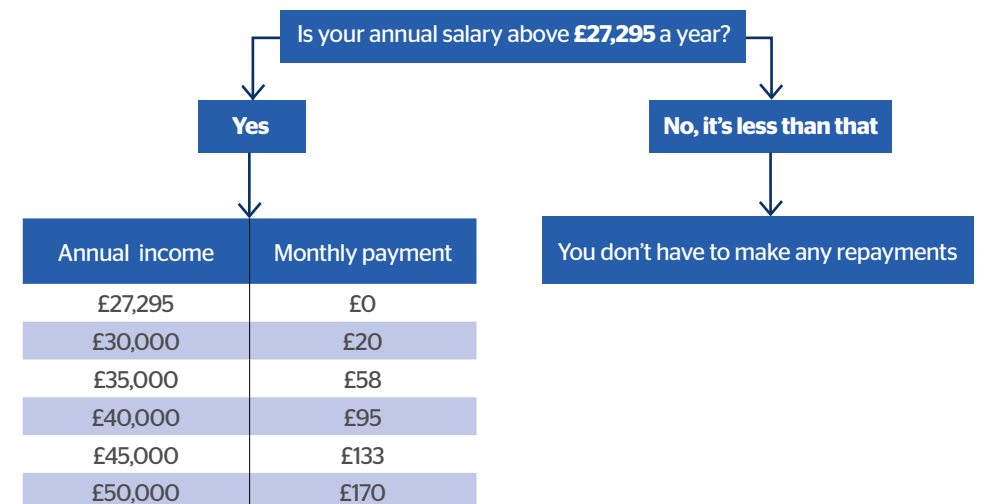

How much can I borrow?

What you can borrow for your Maintenance Loan depends on your family's income and where you'll be living while you're at uni.

And how much will I be paying back after I graduate?

Just to recap, you don't have to pay back anything until your salary goes above £27,295 a year. When that happens, the amount you're earning determines what your loan repayment will be. Any repayments you make go towards paying off both your Maintenance Loan and Tuition Fee Loan - you don't have to make separate repayments.

One campus, a million things to do

We've been around since 1927, passing on our knowledge to generations of learners. One reason we've thrived for so long is that we're always looking to the future - preparing for what's around the next corner, and the one after that. We invest in *our* future, so you can create *yours*.

Knowledge base

The Brynmor Jones Library is a superb learning space, open 24/7 during term-time. As well as the 1,000,000+ books, there are more than 400 open-access PCs.

Allam Medical Building

Blue steel

Alongside our characterful older buildings, you'll find super-modern structures of steel and glass springing up, including the Allam Medical Building - opened by Her Majesty The Queen and winner of Buildings That Inspire in The Guardian's University Awards 2018.

Allam Medical Building

Westfield Court

Close to home

We've built swish new on-campus apartments for 2,300+ students. WiFi, bills and insurance are all included in the rent, so there's only one simple bill to pay every month.

All you need. All your mates. All in one place.

You won't need to go rushing all over town to get to your lectures, play sport, get something to eat, whatever - everything's right here. Big enough that there's plenty to do, small enough that everything's in walking distance.

Hull Sport

A 12-court sports hall, 120-station gym, dance studios, strength and conditioning suite, and floodlit 3G pitches: all on campus, all in one place, and all for you.

The Allam Sports Centre Gym

Social hub

As well as cafés and bars, our students' union is home to the Asylum nightclub, which has hosted gigs by everyone from Blossoms to Professor Green.

Jax Jones @ Asylum

Student Central

Relax and refuel

Outside the labs and lecture theatres, you'll find plenty of places to unwind: bars, coffee shops (including Starbucks and Costa), lawns and plazas.

Eats

Derwent

Red brick

Hull's one of the oldest universities in the country. Home to 1,000+ trees, ivy-clad red-brick buildings ... and an adorable squirrel population.

Turn over for a map of our stunning campus

State of the arts

Middleton Hall is our world-class concert venue, complete with recording studios rivalled only by Abbey Road. It also houses the region's best digital cinema.

Middleton Hall Recording Studio

Middleton Hall

What a good place to be

Some places just have a feeling about them. An ambience. A character. When you step on to our campus, you'll know this is where you're meant to be.

You'll feel right at home in Hull

Room or flat. Standard or deluxe. Cosy or spacious. Our 2,300+ on-campus rooms have something for everyone. And they're open to all - whether you're a first-year applying for a single room, or a second or third-year student wanting to live with your friends in one of our flats.

You're guaranteed a room

If you're a full-time, unaccompanied first-year student, and you apply by 1 October 2021, we guarantee you a room in University-owned accommodation.

One bill, all your utilities

WiFi, utility bills and insurance are all included in your rent, so there's only one simple bill to pay every month.

A landlord you can trust

We take our responsibilities as a landlord seriously. And we fully comply with the Universities UK/ GuildHE Code of Practice. That means you'll have the peace of mind to know all our accommodation is safe, secure and of a good standard.

All you need, all in one place

Our library, sports centre, cafés, bars and shops are all on your doorstep. And you're literally minutes away from your lectures and seminars.

Safe as houses

Round-the-clock help and support is here should you need it. We're here to offer practical help and advice, but also emotional support too. So whether you've lost your key or you're feeling homesick, we'll be there to help.

Convenient instalments

You can pay your accommodation fees in three instalments when your student loan payments come in: October, January and April. Or you can choose to pay monthly. It's up to you.

Exclusive offers

Stay living on campus after your first year, and you'll get exclusive access to our special offers. Plus, all the many benefits above.

Your on-campus accommodation

The Courtyard

- ✓ 12 individual blocks
- ✓ En-suite bedrooms
- ✓ Secluded communal courtyard
- ✓ All bills and basic personal possessions insurance included
- ✓ WiFi (up to 150Mbps)
- ✓ Shared kitchen/dining areas

From Facebook chat to flatmates and friends

Scared? Excited? Anxious? You'll probably feel a bit of each before you leave home for uni. Leah, Hannah and Anna did. Then a chance meeting on a student group chat led to them moving in together. A year on, they tell us what it's been like living on campus and their plans for the year ahead...

Leah

Course:
BA Primary Education

Hometown:
Leeds

Hannah

Course:
MB BS Medicine

Hometown:
London

Anna

Course:
BSc Forensic Science

Hometown:
Stevenage

Did you know each other before you moved in together?

A In the March, we found each other on a Facebook page and we just started messaging.

L There were loads of different group chats. I got added to quite a few and then people were saying where they were living. Then just by chance we found each other.

H You actually have to look for people.

A We talked for so long, which was good.

L I had been scared not knowing anyone, but I felt like I knew you guys already.

How did you feel on your first day?

A I was scared, and a bit sad to live so far away from home.

H I was really excited as well. I was really ready to go to uni.

L When we unpacked the last item in the car, I felt unsure. If someone had said "We can go home," I would have said "Fine!"

What was the first thing you did when your families left?

A We got right into the kitchen together with two of our other flatmates, and had some drinks.

L Then we went to Sanc (The Students' Union bar) for a few drinks.

H Then we just started getting ready to go out.

What was that first night out like?

H I can't really remember!

A It was very good.

L We sat in the kitchen and did our make-up together.

What's your flat like?

H I've really liked it here - it's quite relaxed.

A You feel safe. You've got all these people (on reception) and security's really good. They're always there 24/7 - you can always call them.

H It's good location-wise - everything on campus is really close.

L I know! I've only got a 5-minute walk to a lecture in the morning.

Do you cook together?

A Yes! But even if we're not cooking the same thing, we'll always have tea together.

L We sit and eat together which is good.

What would you say to students considering coming to Hull?

A Living on campus is the best.

L That's what I liked about Hull compared to some other unis I looked around - their accommodation wasn't on campus. It's nice because you're all together here and there's security, which I really liked.

H For nights out it's nice to know you can walk home with at least one person because there will be someone living in the same place.

Why choose Hull?

University is a place to feed the heart and the head. Somewhere to develop yourself personally, socially, academically. It's where you find friends for life. Where you say yes to every opportunity and do things you never dreamed of. It's your key to a brilliant future.

Extraordinary: you may not see it in you, but we do

And we'll give you all the support, opportunities and experiences you need. So by the time you graduate, you'll be well and truly on your way to where you need to be in your life and your career. Where to is up to you. How do we know this? Because this is what happens here. This is what we do.

See the world

Depending on your course, you can spend a trimester or a year abroad as part of your degree (look out for the plane icon on our course pages). But no matter what you're studying, you can still see the world through our Careers service. Make the most of the summer and spend anything from a weekend to eight weeks volunteering, doing a placement or studying at one of our partner universities. Or spend 3 to 12 months as an exchange student. The choice is yours.

Discover who you really are

You'll end up knowing your subject inside out, but you'll discover so much more. You'll learn about independence, budgeting, relationships. You'll gain a deeper understanding of who you are, what you love and what you want to do in life.

Meet new people, become old friends

More than 14,000 students from around 100 countries live, work and play on our campus. Among them you'll find friends for life. You'll laugh till it hurts. You'll talk until the early hours. You'll meet people who just *get* you. And you'll remember the day you first met them 20 years from now.

Career-inspiring work experience

With the likes of BMW, Disney, L'Oréal, IBM, Jaguar Land Rover, Game Republic, Intel and BP, to name a few.

Your home away from home

You'll soon find out there's a real sense of community and belonging here. It's no coincidence that 'friendly' is the word our students most use to describe Hull.

14,000+ students

between 17-82 years
old from around 100
countries

Guaranteed accommodation¹

Most of our first-year students live in our 2,300+ on-campus rooms, so you'll be surrounded by new friends and familiar faces. And with bars, Costa and Starbucks cafés, a gym, a nightclub and a mini-supermarket all on campus, you'll have everything you need just minutes away.

¹ We guarantee you a room in university-owned accommodation if you apply by 1 October.

Do what you love

Whether you're into bands or board games, food or film, history or horror, sci-fi or skateboarding, this is a place to do more of what you love.

Full houses, crowded theatres, big stages...

...eclectic galleries, free museums, new bars, ye olde pubs, famous nightclubs, foodie haunts, bohemian cafés... There's always something to do and somewhere to go in Hull.

See pages 160 - 163 for a student's guide to Hull.

Dope Burger

More gourmet burgers, less beans on toast

Hull's cheaper than Leeds, Manchester, Sheffield, Newcastle, Birmingham, London and more. According to Numbeo, which found we're the most affordable UK city to live in!

Awarded

- Humber Street Sesh
- Freedom Festival
- BBC Contains Strong Language Festival
- Hull Science Festival
- Cottingham Folk Festival

October

- Humber Mouth Literature Festival

November

- Hull Jazz Festival
- Hull Comedy Festival

Subject to government guidelines around Covid-19.

Humber Street

The Deep

Hull isn't a city, it's a river

Strictly speaking, the city is called Kingston upon Hull. We dropped the royal part of the name after we denied the authoritarian King Charles I entry back in 1642. This was one of the key factors that sparked the start of the English Civil War and the end of Charles's controversial reign.

The Humber Bridge

Humber Street Sesh

A student's guide to Hull

We could tell you the best places to go in Hull, but we thought we would leave it to our students. So, here's their guide to Hull ...

Culture lovers

Hull must-do's

- Hull Fair
- Explore the city centre
- Have drinks and food @ The Marina
- The Deep

Did you know that Hull has its very own Banksy?

The artwork appeared on Scott Street bridge on 2018. This inspired the creation of a new art quarter, Bankside, where new graffiti art appears everyday.

Foodies

Best brunch spots

- The Barista on Newland Avenue
- Thieving Harry's @ The Marina
- Nibble @ The Marina
- Secret Garden Café in the city centre

“Gadgie burger!! - GET YOURSELF A GADGIE BURGER and thank me later.

Abigail
Psychology ClinPsyD

“Some of my favourite places are on Newland Avenue! There's so many places to eat, and a lot of them do great deals. Craft & Dough is my favourite - the pizzas are huge and they have great cocktails!

Josie
MSc Renewable Energies

“Anywhere that has fish and chips: I don't think you can beat them in Hull.

Grace
BSc Biology Graduate

“Go to the Bonus Arena, Ferens Art Gallery, watch Hull City, have a wander around the Marina and Old Town and The Deep - there is lots to do.

Chris
BA Business and Marketing

“My favourite place to go to is no doubt the theatre! I've seen *Cabaret*, *Kinky Boots* and *Les Misérables*. Who says you need to travel all the way to London just to watch the biggest musical hits?

Kelly
BA Creative Writing and Film Studies

“Go to The Deep and see the penguins. You can't get any better than that.

Joshua
LLB Law

Best dinner spots

- Butler Whites @ The Marina
- The Greek on Newland Avenue
- Shoot The Bull in Old Town
- Level on Newland Avenue

“Trinity Market - an inside food market selling Italian, Greek and all sorts of food.

Jessica
BA Human Geography

🎵 Kaiser Chiefs at the Adelphi

© Ian Rook

★ Everything else...

★ The Boardroom

Chip spice - every Hull student knows you can't graduate without trying it. Rules are rules, and all that.

“ Go down Newland Avenue - especially The Boardroom Cafe!

Natalie
BSc Computer Science

“ Go to Old Town in the city centre - it's really pretty.

Erin
BA Psychology, MSc Social Research

🎵 Music lovers & night owls

Best nights out

- Monday @ Piper
- Wednesday @ Asylum
- Thursday @ Welly
- Saturday @ Attic

“ Best night out has to be Welly Thursdays! There's something for everyone.

Emily
BA Business and Marketing

🎵 The Welly Club

“ Asylum on a Wednesday night is a must-do!

Shona
BA Politics, Philosophy and Economics

“ You must go see some live music! Hull has a really good music scene.

Hannah
BSc Marine Biology Graduate

🎵 Humber Street Sesh

Don't miss Pride in Hull!
The region's biggest LGBT+ event takes place in July every year.

“ Go to the Humber Bridge, get cool pictures, put them on the 'gram.

Aaliah
BSc Accounting

This is **your** students' union

A place to be bold, be brave, belong. To go over and above or just do what you love and have fun. Where you can speak out, stand proud and conquer your fears. It's a springboard when you're aiming high, and a safe space to give it a try. But whatever you do, make it count.

More than welcome

We don't have 'freshers week' at Hull - we have our two-week *WelcomeFest* instead. Jam-packed with non-drinking events and big nights at our on-campus nightclub, it's a chance to meet new friends, discover our societies and explore the campus and city.

Where you go to get together

Cafés, bars, bake sales, campaigns, performances, big-name gigs like Scouting For Girls, Tom Odell and The Pigeon Detectives (to name-drop a few) ... there's always something to see and do here.

Make your voice heard

Whether you want to represent other students academically, join one of our 100+ sports clubs, societies or volunteering groups, we'll help you get started.

You. But better.

We're here to empower you. Helping to make your time at university count. Supporting you to stand up for what you believe in and step into the future as your best you.

For students, by students

Your union is led by the Student President team, elected by students every year, and supported by student reps. You automatically become a member when you accept your place, so you're already part of something bigger before you even get here.

Find out more at hulluniunion.com

“ I'm so proud to be part of such a passionate and proactive student community in Hull and to be part of a team that makes such a positive impact on campus.

Phoebe

President of the Students' Union 2020/21

Our societies

Did you know we have more than 80 sports clubs too? From Dance Squad to Tennis, Netball to American Football, there's something for everyone to try.

“ You meet so many new and different people when you join a society. It expands your friendship group.

FIND YOUR FIRE

When you choose to be a part of sport at Hull, you're carrying the torch for the University, for your team and for yourself. You're also choosing some of the best sport and fitness facilities in the country. Discover the Hull Sport Park, and find out what our £16-million investment means for you.

Talented Athlete Programme (TAP)

Each year we award TAP scholarships to selected high-performing athletes. As well as a cash award, you get a tailored package of support to suit you and your sport. This can include advice and mentoring in sports science, strength and conditioning, physiotherapy, personal development, nutrition, lifestyle and psychology.

To find out more and apply for a TAP scholarship, please email sport@hull.ac.uk.

Holly

- Great Britain Olympic Games Trials
- England Commonwealth Games Trials
- 4 x Yorkshire Counties Swimming Championships Silver Medallist

Hull → Beijing → Tokyo

Hull student and TAP member, Holly Williams, is competing in the Great Britain Olympic Games Trials, hoping to secure a place in Team GB for the 2020 Tokyo Olympic Games.

“I started competitive swimming when I was 8 years old. I've qualified for three events for the Beijing 2020 Olympic Trials: the 50m, 100m and 200m Fly. Qualifying for the Olympic Trials has been the highlight of my swimming career so far.

I got involved in TAP 3 years ago and the rehab has massively helped me with any injuries I pick up. The strength and conditioning has made a lot of difference to my training, my sprinting ability and my overall strength and fitness. The TAP staff are always on hand if I have any problems or need to talk to them regarding my programme.

Holly Williams
BSc Applied Sport Science for Performance / MSc Clinical Exercise Physiology

“Joining hockey has improved my teamwork skills, and it’s a great way to make friends and keep fit. It’s a really social club - we have a social every Wednesday and do other events throughout the year.

Lydia
MChem Chemistry, Women’s Hockey

Extraordinary experiences

We don't just exist to teach. We're here to help you prepare for life after university. Whether that's a year studying abroad, a rewarding work placement, or a volunteering role you can't get anywhere else. So by the time you graduate, you'll be well and truly on your way to where you need to be. Where to is up to you.

We aim to give you experiences that'll help you flourish in whatever you choose to do. And wherever in the world that takes you. You'll find more about these opportunities in our courses section, starting on page 18.

At first I didn't believe it. Then I was like, "I'm going to Tokyo!"

I'm Natalie, I'm a Music Tech student, and I recently went on a 5-day trip to Tokyo with the University and Team GB. It's a place I've always wanted to go to, and the fact I'd be going to record sound and video too ... I felt very lucky and thankful for the opportunity.

Natalie

Course:
3rd Year BA Creative Music Technologies

Hometown:
Cambridge

Work experience
360° video and audio recording for VR project, Tokyo

Hull in 3 words: Amazing, amazing, amazing!

Must-do in Hull:
Go to Boardroom on Newland Ave with friends and play some games.

Favourite place on campus:
Top floor of the library - it's a nice view.

“ They were looking for a student to help with some 360° video recordings and audio recordings - I had a good background in audio recordings.

I hadn't used a 360° camera before, so that was a good experience. The idea was to integrate all the video and audio content into an Immersive Technology project so the athletes could use it to become more familiar with the locations.

I was able to focus a lot on time management. There were a lot of locations, and 50 to 60 different recordings to capture, so we had to be as efficient as possible.

It's been a one-of-a-kind opportunity. It will definitely look unique and stand out to employers.

“ Tokyo was amazing. I would stop every five seconds to take a picture of something. And when we went to the top of Tokyo Tower, we could see Mount Fuji from one of the windows. It was pretty cool.

OFFICIAL UNIVERSITY PARTNER

I travelled through the Netherlands, to Malta, Morocco, Brussels, Germany...

My year abroad was amazing. 10 out of 10. I went to Utrecht in the Netherlands. It's about 25 minutes away from Amsterdam on the train.

“ The Netherlands is a really small country at the heart of Europe, so you can travel anywhere in Europe within an hour or two really - if you've got the will-power and a good bus ticket!

“ I met some incredible people while over there - my friend was the Grand Master of chess in Australia, I lived opposite a Buddhist temple and became friends with the monks, and networked with people who are high up within the Hague.

“ I spent a lot of time eating the food and travelling - I travelled through the Netherlands, to Malta, to Morocco, to Brussels, to Germany - it was just an incredible experience and it really taught me a lot about myself.

Joshua

Course:
4th Year LLB Law

Hometown:
Middlesbrough

Favourite Hull Foodie spot:
Dope Burger

Must-do's in Hull:
Go to The Deep - see the penguins! Can't get any better than that!

Best night out:
Piper on Newland Avenue - cheap drinks, beautiful place.

Favourite spot on campus: The (Cairns) statues of men around campus. One of my favourite things I've ever seen.

Sum up Hull in 3 words:
Tasty chip spice.

I'll be leaving uni, and Jaguar Land Rover, as a business-woman

I'm Emily, and I worked in Global Product Marketing at Jaguar Land Rover for my placement year. To get a placement with such a big, well-known company was absolutely fantastic. I've learnt so much, and it's given me a completely different outlook.

“ My personal highlight was attending a customer clinic, where you invite all potential customers so you can improve the car for the next generation.

It's going to be really exciting when, in a few years, I'll be able to look at a brochure and think - I did that!

Emily during her placement at Jaguar Land Rover

“ I'm so much more confident now in knowing what I want to do in my career and how to achieve it.

Emily

Course:
BA Business and Marketing Graduate

Hometown:
Nottingham

Hull in 3 words:
Friendly, affordable, fun.

Favourite foodie spot:
Nibble by the Marina. Amazing coffee, chilled vibes and cheap cake!

Favourite place on campus:
Derwent building. It's so picturesque and the café always has such a buzz about it!

Must-do's in Hull:
Hull Fair. And The Deep - who wouldn't want to see baby penguins?

Seeing killer whales in the wild was such a highlight

After I had finished my exams in May, I moved to the Isle of Mull in the Hebrides to take part in a 4-month volunteer placement with The Hebridean Whale and Dolphin Trust as an Outreach and Research Assistant.

“The thing I love most about this job is that no two days are the same. You never know what you are going to see out on the water or what you’re going to get up to that day. Obviously being outside seeing some incredible wildlife is also a bonus! Seeing killer whales off Handa Island (West Coast Scotland) was just incredible and very emotional.

“ Studying at Hull was probably the best thing I’ve ever done! It really gave me the confidence and skills to apply for this sort of role and actually succeed. The knowledge gained from the course was transferable and really beneficial to working in this field.

Hannah

Course:
BSc Marine Biology Graduate 2019

Home town:
Northumberland

Favourite Hull foodie spot:
Cafe Gelato on Newland Avenue - the jammy dodger ice cream!

Favourite spot on campus:
The top floor of the library. I spent many a sunset and sunrise there.

Must-do in Hull:
Go see some live music, whether that’s at Adelphi or Welly or The Polar Bear.

Hull in 3 words:
Vibrant, friendly, surprising.

Our support. Your hard work. Together, unstoppable.

There's a reason so many of our students go on to do extraordinary things. Because at Hull, you matter - no matter where you've come from. We don't just see your grades, we see your potential. That spark of greatness inside you - you may not see it, but we do.

Maybe you want to be the next CEO of a national powerhouse. Or a researcher who changes lives around the world. Or someone who gives people a voice in your local community. Or maybe you're still weighing up your options. Either way, you'll get all the support you need to flourish in whatever you choose to do and wherever in the world it takes you.

Turn your 'what ifs' into 'anything's possible'

Nothing should get in the way of reaching your personal best. With our team of academics, advisers and experts by your side, there's no stopping you. So whether it's about money, your health or your studies, or you need pointing in the right career direction, you only have to ask.

We don't just see your grades, we see your potential

Need a boost to get into first year? That's what a foundation year is for. Want hands-on experience? We can open the doors to CV-boosting opportunities like work placements or field trips.

Come as a beginner, leave as a pro

Worried about the transition from A level standard to degree level? Whatever stage you're at now, our Study Skills team will help you get to where you need to be.

More time to settle in

The happier you are, the more likely you'll do well. That's why our *WelcomeFest* runs for two weeks, not just one. More time to make friends, more time to explore Hull, more time to settle into uni life.

A safe space, day or night

Our campus is monitored 24 hours a day, 365 days a year by our Facilities and Security team. The Courtyard and Westfield Court also have staff on site 24 hours a day.

Our students' union also offers:

- Free personal protection alarms
- Trained student volunteers, Hull University Angels, at Asylum every Wednesday night to offer support and a safe space should you ever need it

Ready to help before you even start

When you accept a place, we'll be in touch to ask you a few questions about any learning differences you may have. Then we'll let you know what extra support you can get.

No waiting, no appointments, just call or walk in

For some of our services, you won't have to book a time or wait for weeks to see our support staff - just call or walk in the same day! That way we can start helping you straight away.

Talk to someone who's in your shoes

If you ever find yourself struggling, you can speak to one of our trained student volunteers, or Wellbeing Champions as we call them.

Stronger together

You'll find all our support services in one place: Student Central. Our experts work side by side, so together we'll find you the best help.

¹ This does not apply to all services and is subject to availability. Appointments are available Monday to Friday, 9.00 am to 5.00 pm.

Please visit hull.ac.uk/studentssupport for more information, or contact us at studentssupport@hull.ac.uk or 01482 462222.

International student?

This is what you need to know...

Have a question about visas? Want to know more about entry requirements and how to apply? Need to improve or refresh your English before you start? We can help you.

Global Student Recruitment Office

I will not be able to visit on an Open Day. Can you come to me?

Yes, we regularly visit university exhibitions overseas to meet potential students and talk about our courses and life in Hull. To find out more, visit www.hull.ac.uk/country.

Can I talk to you online instead?

Yes, we hold regular web chats and webinars where you can talk to current students, ask questions and learn more about studying with us. To find out when our next event is, please email global@hull.ac.uk.

Can I take a virtual tour of your campus?

Yes, please visit virtualltour.hull.ac.uk. Here, you can view our red-brick buildings, find out where you will be studying and living, and see what our £300 million campus investment means for you.

Visa and immigration support

Do I need a visa to study in the UK?

The easiest way to check is at gov.uk/check-uk-visa. For free visa advice and support, please call us on **+44 (0)1482 462222**.

IECT

Students and applicants can raise an enquiry in **MyHull Portal**.

Prospective students can email IECT@hull.ac.uk.

Welcome weeks

How do you help international students settle in?

Our two-week *WelcomeFest* includes international orientation and briefing sessions, plus lots of social activities for all students where you can try new things and meet new people.

Can you pick me up from the airport?

Our **FREE** airport pick-up service from Manchester Airport will bring you to the University before *WelcomeFest* starts. We also run a free pick-up service for pre-sessional students arriving over the summer. Register here: hull.ac.uk/internationalarrivals.

Scholarships

Are there scholarships for international students?

Yes, there are a range of scholarships on offer for international students. To find out more, please go to www.hull.ac.uk/scholarships.

Accommodation

Do I get guaranteed accommodation?

Yes, if you are a new, full-time international student, you are guaranteed a room on campus for your first year of study. Just as long as you apply by 1 October 2021.

“ I would definitely recommend Hull! The lecturers are very supportive and the careers centre gives so many opportunities for students like CV writing workshops, and networking events.

Jin
Malaysia, LLB Law

Entry requirements

What are your entry requirements?

Each application is considered on its own merit. You can find typical entry requirements at hull.ac.uk/international, or email us at global@hull.ac.uk to find out more.

Do you accept alternative qualifications?

Yes, and we welcome students from all educational backgrounds. All applicants will be considered on a case-by-case basis.

What if I do not meet the entry requirements?

You may be able to join one of our foundation programmes. When you successfully complete it, you are guaranteed entry to a University of Hull degree programme.

Foundation programmes

What foundation programmes do you offer?

ONCAMPUS Hull

For students who want to study a course from our Faculty of **Business, Law and Politics**, or the Faculty of **Science and Engineering**.

Based at our campus, our partnership with ONCAMPUS offers pre-university and first-year programmes leading to a range of undergraduate and postgraduate courses.

To find out more about our ONCAMPUS courses, please visit oncampus.global/hull.

“ Hull is a very cool city – I feel great to be a part of this community.

Marian
Ghana, BA
International Business

English language support

Do I need English language qualifications?

If your first language is not English, or you need a Student Visa to study, you will need to provide your English language qualifications before you can start your course.

Why do I need them?

For two reasons: 1. To make sure you can gain maximum benefit from your studies. 2. To gain a visa from the UK Visa and immigration (UKVI). For more information visit www.gov.uk/student-visa

What English language qualifications do you accept?

We accept a range of English language tests and qualifications. You can find the full list on hull.ac.uk/englishlanguage requirements, but here are the most common:

- International English Language Test System (IELTS)
- Cambridge Certificate in Advanced English (CAE) - C or above
- Cambridge Certificate of Proficiency in English (CPE) - C or above
- Cambridge 1119 O Level English Grade C
- West African Examination Council (WAEC) - C/6 or better
- Indian Standard XII - 70%-75% in English
- Hong Kong Diploma of Secondary Education (HKDSE) - 4 overall: minimum 3 in each skill (or level 3 overall for foundation year entry)

However, some programmes have different requirements.

What English language courses do you offer?

University of Hull English Language Programme (UHELP)

Depending on your current English language level we run a variety of pre-session courses to help you prepare for your studies at Hull.

In order to qualify to study in the UK on one of our pre-session courses you must undertake a UKVI Secure English language test (SELT) at a minimum level of B1.

Our courses vary in length and intensity, dependent on your individual need and ability. Our longest programme is three semesters (36 weeks) and our shortest programme is four weeks.

For any advice or guidance please contact our EFL Application Team on **+44 (0)1482 465099** or email us at pat@hull.ac.uk

What will I study?

These programmes are designed to help you:

- Learn how to write academic essays
- Gain lecture and seminar skills
- Learn how to give presentations
- Master multi-cultural communication
- Enhance your English language skills
- Accustom yourself to British life and culture

To find out more about our English language courses, please visit hull.ac.uk/efl.

How to apply

How do I apply for an undergraduate degree?

There are two ways:

1. You can apply through the UK's centralised admission service (UCAS) at UCAS.com.
2. You can apply directly through a University of Hull representative in your country. To find a representative, visit www.hull.ac.uk/country and select your country.

Visit hull.ac.uk/apply to find out more and apply.

Take our 360° virtual tour

View our red-brick buildings, find out where you will be studying and living, and see what our **£300-million campus investment** means for you.

Glossary

Alumni

Alumni are graduates of the University. Once you've graduated too, you'll join them as part of our global network.

Applicant Experience Day

An Applicant Experience Day is your chance to find out about your course in depth. You'll be invited to one of these if we offer you a place.

Bachelors degree

A full-time Bachelors or undergraduate degree usually lasts three or four years. All ours are 'honours' degrees: a higher academic standard than an 'ordinary' degree.

Clearing

Clearing is how people without a university offer can apply for any remaining places. Clearing runs between July and September. See page 136 - 137 for more on how to apply.

Conditional offer

If you get a conditional offer from us through UCAS, congratulations! This means we'd like to offer you a place, as long as you meet the entry requirements of the course.

Credits

To gain your degree, you must pass with enough credits. Most of our modules are worth 20 credits, and you can earn 120 credits each academic year.

Deferred entry

Want to take a year out before uni? We're happy to accept deferred entry applications through UCAS. Call 01482 466100 or email admissions@hull.ac.uk to find out more.

EU student

A student whose permanent or family home is in an EU country outside the UK.

Faculty

Each subject area belongs to a faculty. We have four: Arts, Cultures & Education; Business, Law & Politics; Sport, Health & Exercise Sciences; and Science & Engineering.

Firm choice

When you receive university offers, you nominate your preferred one: your 'firm choice'. You can also pick a second 'insurance' option if you have conditional offers.

Foundation year

An extra year of study at the start of a course, designed for students who don't meet the requirements for direct entry onto one of our degrees. See page 21 to find out more.

Fresher

Anyone who's just started at uni is a fresher. Although they're technically freshers during their first year, the name is mostly used during the early weeks of Trimester 1.

Full-time

A full-time student follows our standard trimester-based teaching pattern, and usually takes three or four years to complete their Bachelors degree.

Home student

A student who's lived in the UK for purposes other than education for three years before starting their course, and is eligible to pay fees at the 'home' rate.

IELTS

The International English Language Testing System. A standardised English language test for non-native speakers. IELTS covers listening, reading, writing and speaking.

Industrial placement

An industrial placement helps you gain professional experience while you're studying. You'll spend either your third or fourth year working in your chosen industry.

Integrated Masters degree

Four-year degree that includes a postgraduate year. So, instead of earning a BA, BSc or BEng, you leave with a higher qualification like an MChem, MPhys, MMath, MBus, etc.

International student

A student whose permanent or family home is outside the UK and EU.

Joint combined honours

A degree that covers two subjects, with your time split equally between them, like History and Politics, Business Management and Marketing, Philosophy and Politics, etc.

Lectures

Lectures are one of the main ways you're taught a subject. They're usually delivered to larger groups of students on a specific topic, often in a lecture theatre.

Major/minor

A degree where you specialise in one subject (major) while gaining insight into another (minor), like Psychology with Criminology, Law with Politics, etc.

Mature student

A mature student is anyone aged 21 or over when starting their undergraduate degree.

Modules

Each degree is made up of modules. Some span a year, others one trimester. Some are core, others optional. Each is assessed and your average score is your result for the year.

Open Day

Open Days let you visit the uni before applying. Explore the campus, meet lecturers, speak to students, view the accommodation and tour the city. See page 6 for more information.

Part-time

Part-time students take fewer modules each year. So you can take a part-time degree over a longer period than the full-time equivalent.

Postgraduate

You can study a postgraduate degree after finishing your first degree. There are taught Masters like MA, MSc, MEng or MBA, and research degrees like MPhil, PhD or MD.

Seminars and tutorials

Delivered in smaller groups than lectures, seminars offer you the chance to discuss, debate, present and take part in group work.

Single honours

A single honours degree focuses entirely on one subject.

Societies

Societies are organised by students and usually involve a sport, hobby or cause: from football to Harry Potter and public speaking to Ultimate Frisbee. See page 166-167 for more.

Study abroad

A chance to spend time working or studying in another country. We have more than 100 partnerships with other universities worldwide - from Australia to the USA.

Trimester

Academic years are divided into three trimesters: September to December, January to May, and June to August. Exams are at the end of each trimester.

UCAS

The Universities and Colleges Admissions Service runs the application process for UK unis. Unless stated otherwise, you apply for our courses through UCAS. See page 136-137.

UCAS course code

Every degree has its own UCAS code. Some offer a foundation year, study abroad, industrial placement or integrated Masters - each variant has its own UCAS code.

UCAS Extra

If you've not got an offer, or changed your mind and declined any offers, you can apply for more unis or different subjects through UCAS Extra (which runs from Feb to June).

Unconditional offer

If we make you an unconditional offer through UCAS, congratulations! This means you can secure your place by accepting our offer as your firm choice.

Undergraduate

The first level of study in higher education. An undergraduate is someone who's studying for, but hasn't yet completed, a Bachelors or integrated Masters degree.

The (not so) small print

The information in this brochure is provided by the University of Hull, and is for general information purposes only.

We do everything possible to keep the information up to date and correct. But we make no representations or warranties of any kind, expressed or implied. Whether about the completeness, accuracy, reliability, suitability or availability with respect to the publication or the information, products, services or related graphics contained in the publication for any purpose. Any reliance you place on this information is strictly at your own risk.

We're continually adapting and evolving our courses so that we meet the changing needs and expectations of our students and employers. We check that our programmes reflect national benchmarks; that they enhance our students' skills; that they're relevant to you and to your potential future employers; and that they meet the demands of regulatory bodies (for example, to earn accreditations that are essential in some subjects and for some professions).

What this all means is that the course information in this guide is correct at the time of going to print. But - for the reasons we outlined above - some of our courses could still change before you start university in September 2021. You can find all the latest information on the course pages of our website. Or if you have any questions or need further info, you can contact our admissions team at admissions@hull.ac.uk.

In no event will we be liable for any loss or damage. Including, without limitation, indirect or consequential loss or damage. Or any loss or damage whatsoever from loss of data or profits arising out of, or in connection with, the use of this publication.

For the latest on our programmes, please go to the course pages on our website.

Tell us what you think

Please write to Student Recruitment and Marketing, University of Hull, Cottingham Road, Hull, HU6 7RX, UK.
